will be small

Mr Harold Wilson, when Prime Minister, was correct to insist on television during the financial crisis of 1967 that the

pound in your pocket remained unchanged. It has in fact remained unchanged since 1960, but from early next year it is to be reduced by several six-teenths of an inch in both discretions.

Production has begun at the

Bank of England printing press at Loughton, Essex, of a smaller £1 note which will go into cir-culation in the new year. It is predominantly green, carries the head of the Queen from the

picture of Sir Isaac Newton

the Scottish pound note, it is five eighths of an inch narrower

The new note, designed by the Bank's staff and printed by

offset lithography, completes a series introduced in 1968 and is

intended to harmonize with the

which bear portraits of the Duke of Wellington, Florence Nightin-gale and Shakespeare. The

reduction in size is explained

as an attempt to make it easier to differentiate between a pound note and a fiver in the dark. It will also assist the

An unwelcome feature of the design, particularly to those who habitually tear their money

in two, is that it carries only one set of serial numbers, at

the bottom right-hand corner of the front. The left-hand side is

left clear to allow banks to overprint their own code numbers for electronic sorting.

The Bank of England gave an

assurance yesterday that arolications for a refund from people holding only the lefthand end of a new pound would be considered. It hopes the new design will present a more difficult challenge to

Huge supplies of the new notes will be required as the

life expectancy of a note has gone down with its value. There

are 800 million £1 notes in circulation but their average life

is between nine and 10 months, compared with 11 months five

years ago. When the 10 shilling

oote was withdrawn in 1970 its

life expectancy was down to six

The first pound notes ap-peared in 1797, when the Bank

of England issued 700.000, as well as £2 notes, each signed by the chief cashier. Previously it had been illegal to issue paper immay in denominations of less

seg of a surprise to all and including the vast purps which has been the jury's verdict. As assed the general extensions the trial

g her charges.

Almost certainly, the Government will come under increasing pressure to stimulate the nomy and thereby provide a boost to employment. Res-ponding yesterday to the latest figures, Mr David Easnett, general secretary of the General and Municipal Workers. Workers, and Municipal Workers, Britain's third largest trade union, called on the Government to cut the rate of value-added tax as a means of bring-ing down the cost of living, and

helping to reflate the economy. A vigoroous new effort is needed from the Government if memployment is not to reach levels unknown to generations of working people in the United Kingdom, Mr Basnett

Mr Clive Jenkins, general secretary of the Association of Scientific, Technical, Managerial Staffs, commented:

These deeply horrifying statistics are the colfin nails limits pay rises to one a year.

"We need more purchasing power in people's pockets to eries tanked up again, he insisted. Mr James Prior, the Tory spokesman on unen ment, criticized the Chancellor, "complacently going on holiday while was so high".

for Mr Healey by the fact that, for demographic reasons, there are more people now joining the labour force each year than in earlier years.

Many of the extra numbers

are school leavers. Although there was a sharp drop in un-employment among school

the existing unemployed. This is thought partially to account for the large increases in registered jobless during June and July, even after school leavers are excluded.

Particularly disturbing is the rise in the number out of work for a prolonged period. Some 1,180,000 people under 60 years of age have been without work for four weks or more. This figure has been rising steadily for many months.

Callaghan

spy devices

After conducting "detailed inquiries " the Prime Minister,

ssued a statement yesterday

denying last month's newspaper

reports that during Sir Harold Wilson's time at 10 Downing

Street British security or intelli-gence agents fixed listening devices in his offices.

The reports carried no more verisimilitude at the time that bints that Sir Harold himself had confided his supicions to journalists. That made neces-

sary the inquiries carried out by Mr Callaghan, who hears ultimate political responsibility

for state security, and Mr Rees, Home Secretary, the minister to

whom the security service is responsible from day to day. The statement from 10 Down-

ing Street read: The Prime Minister has conducted

octaled inquiries into the recent allegations about the security ser-tice and is satisfied that they do not constitute grounds for lack of confidence in the competence and

in particular, the Prime Minister

In 10 Downing Street or in the Prime Minister's room in the House of Commons.

A footnote adds that Mr Rees, as minister responsible for the security service, was closely involved in the inquiries

and completely agreed Some politicians found it deeply disturbing to read alle-

gations purporting to be ex-cathedra, that a Prime Mini-ster's offices could be "bug-ged", especially when the reports added that the security

reports added that the security service had confused Dr Owen, the Foreign and Commonwealth Secretary, and Mrs Hart, Minister of Overseas Development, both members of the Cabinet, with other people of the same names. That explains Mr Cal-

laghan's reference to the com-petence of the security service.

Mrs Thatcher commented last night: "I share the Prime

denial on

Hongkong, Aug 23

The new constitution of the Chinese Communist Party lays heavy stress on discipline within the party ranks, reversing the previous emphasis on the freedom of party members to "swim against the tide" in the interests of radical ideas.

Undergoing its third revision in less than a decade, the constitution was introduced to the recent eleventh party congress in Peking by Marshal Yeh Chien-ying, the Defence Mini-ster, himself thought to be a strong believer in discipline and

The new constitution gives increased emphasis to the party's role as the "vanguard of the proletariat", and specifi-cally opposes "dogmatism". although it pays tribute to Mao and his leaders. It confirms Chairman Hua Kuo-feng's state-ment that the Cultural Revolution which began in 1966 is now Red Guard organizations as considered to be definitely at an end, and it drops references to having a role to play in the

party's work. The document also reiterates the promise made by Chou en-lai, the late Prime Minister in 1975, and reiterated by Chairman Hua in his congress speech

"powerful modern socialist country" by the end of the century. This slogan is seen as the antithesis of the ideas of "self-reliance" put forward by the former radical group around Map Tsetung's widow. Chiang

Ching, and Mao.

A further rebuff to the radicals is the emphasis on frankness, unity, and resistance to conspiracy, secondended by Mao himself. The adjustation to "swim against the tide" is retained only with reference to "tides which run counter to these three basic principles". The new constitution also gives a warning against favouritism and careerism, of which the "gang" are specifically

The levels at which party committees' funcionaries are elected in both the civilian and military sectors has been laid down as county and regimental down as county and regulerinal tional work and disciplinary measures are made subject to the approval of higher party organs, and the provision for probationary membership has been made more strict.

The general tenor of the new statutes is to bring the party more into the centre of the political stage at all levels

#### White Paper possible before drafting of new information Bill

White Paper on government secrecy early in the next ses-sion before drafting its Official Information Bill as a replacement for section two of the Official Secrets Act. 1911.

Ministers are apprehensive about the Bill's reception in Parliament. It is felt in some quarters that there is no cer-tainty of a majority for a new secrets statute of any kind,

screts statute of any kind, given the composition of the present House of Commons.

The volatility of MPs on such matters as official secrecy and upen government has led some ministers to canvass the suggestion that parliamentary opinion should be ested through a should be tested through a White Paper and a debate before a new Bill is prepared. They think it possible that a government Bill would emerge attered beyond recognition, with backbenchers forcing amendments along the lines of the American Freedom of Information Act, obliging ministers to disclose more information at the characters of the desired than they desired the control of the con

tion than they desired.
At the last meeting of the Cabinet committee on official secrecy, chaired by the Prime Minister before the summer recess, Mr Callaghan is thought to have indicated a personal preference for proceeding directly with a Bill. An undertaking to replace the catchall section two of the Official Secrets Act, which forbids unnuthorized disclosure of government information of any kind, is a prominct element of the Government's parliament. the Government's parliamentary pact with the Liberal

Euta delaying White Paper rated most likely in Whitehall, though no definite deci-That will await the next meeting of the ministerial commit-

tree at the end of September or the beginning of October.

As reported in The Times earlier this month, the Cabinet committee has experienced committee has experienced great difficulty in drawing a line for the new "defence and

into consideration.

Miss Cynthia Cruickshank, for the prosecution, said: "He said he got the cannabis in Bombay for about £850. He

said others were involved but if he told the names of any-body he would be dead." She

admitted having brought in a quantity of the drug last Decem-

ber, and having sold it at £100 an ounce in Clapham, London.

Mr John Reilly, for the defence, said Mr Woolnough was a drug addict. His mother worked in the office of the

Prime Minister of Rhodesia

and is obviously a respectable

internationa, controlental classification, beyond which unauthorized leaks would involve the sanction of criminal law.

A wider philosophical uncertainty about the whole enterpris chas bedevilled ministers once they have moved beyond general principles. Official secrecy is likeaed to industrial democracy in Whiteball as an issue on which no government can win, whatever it decides to do, in terms of public response and parliamentary

Some ministers have become convinced, by hostile newspaper reaction to the Home Secre reaction to the Home Secretary's announcement last November of the Government's intention to legislate, that far from being judged a liberal, reforming measure, a new Act might be regarded by those it was meant to aid as a regressive, repressive step. They have admitted that the replacement of a crude but unusuable law by a more limited, precise and practical statute might be the reverse of the progressive development they had intended. Official secrecy has generally become confused with open government (the desire to disclose more information deliberately has been treated as a separate matter by ministers from attempts to prevent

from attempts to prevent unintended revelation) and to some extent with privacy. The more cyclical in Whitehall bave long felt that political sensi-tivity rather than security has ben the real brake on ministerial intentions and that the non-existent classification of "politically embarrassing" is of far more concern to them than any document labelled

#### Eviction letters cause terror, MP tells court

Mr Thomas McMillan, Labour MP for Glasgow, Cameral, said at Glasgow Sheriff Court yesterday that eviction notices Keith Woolnough, aged 25, from Salisbury, Rhodesia, pleaded guilty at Reading Crown Court yesterday to evadsent by a council were letters of terror. ing prohibition on 1,210 grams of liquid cannabis in April and was jailed for 18 months after having a similar offence taken

Some of the notices caused old people fear and alarm. Mr McMillan was in court to fight for a widow who was being evicted.

He said that Mrs Maria Moneghan, aged 58, of Aber-cromby Street, Bridgeton, Glasgow, had become a nervous wreck since Glasgow District Council had given her notice to pur her house in April. Mrs Monegism has rejected offers of three houses in other districts. She says the council

has previously twice ordered her to move home Sheriff J. Irvine Smith gave the council permission to evict Mrs Moneghan, but suspended the order for five weeks so that she could talk to the

council again.

#### calorie on slimming foods

By Hugh Clayton

Ministers announced a re-prieve yesterday for the calorie on labels of slimming and other specil foods. The rejected a recommendation from scientists that the joule should start to replace the calorie as a measure of energy on such labels next

The recommendation from the Food Standards Committee, a group of scientists appointed by ministers, who usually accept its proposals for changes in the law. Their re-jection of the joule has nothing to do with its merits compared with those of the calorie.

The committee was asked to examine calories and joules more than a yar ago because the EEC had published rules about units of measurement that would eventually entail changes in British fool labelling

Community has introduced rules that make the background to the committee's study obso-

Lust October the commit-tec published the complex framework for a two-year pro-gramme in which the joule would gradually replace the calorie. It recommended that where as a gram of alcohol is taken to contribute seven kilo-calories of energy, it should henceforth be considered to give 29 kilojoules.

Ministers have rejected the Ministers have rejected the committee's plan because in its further pursuit of "harmonizations" of food laws the EEC this year published a directive on foodstuffs for particular nutritional uses.

That cut across the terms of reference of the committee's investigation and necessitated further study of the effects of EEC rules on British law. The committee was looking at the use of the joule for labelling, but in the light of the new directive the Government has decided o consider how it will affect the much wider Food and Drugs Act and comparable laws in Scotland and Northern

It is not the first time that studies of changes in British food law required by EEC "harmonization" have been changed radically by further changes in the Community. In 1975 a study of date-marking of footgramment was oversion by Government was overtaken by EEC rules contrary to its re-

George who is now clerk to the parish council, said: "I regret the passing of things, but I try to look on the bright side." Some things I am glad are done away with. People were poor, and that was not easy. It might be difficult to recognize, but I think Hardingham will be here in twenty years."

village school in 1972 is Mrs Edna Wilson's particular memory. She moved to Hardingham 20 years ago and was the school's head teacher until two years before it closed.

"It was kept open for its last two years only because we fought for it," she told me. "I

when I retired. When they tried again to close it there was really no opposition.

"It was, of course, good for the children to have their own little school. It meant that the children were always together in the village, keeping the community spirit alive, and the parents, too, would come to see us."

In its recent warning about the decline in village life, the Council for the Protection of Rural England said there was evidence that children taken by bus to school showed signs of disturbance in direct proportion to the length of the journey.
Mrs Wilson told me: "The

closure of the school had an effect on the children. I found as some as they were bused to school they played trunt, which never happened before, it was the difference in atti-tions of the teachers. I do not believe in this busing of children

ingham's past than to imagine the village is dying."

The closure of the village is dying."

For her husband the school in 1922 in t For her husband, Mr Reg Wilson, a retired railway worker, the closure of the post office was the last straw. We have a car, but it must be horrible to have to ask someone to get your pension. People do not always want

Leaving Hardingham is the solution that the Eke family

is taking. Richard Eke, aged 34, a bricklayer in Hingham, near by, his wife, Frances, aged 32, and their children, Josephine, aged nine, and houses, private and council. She said: "Hardingham Charlotte, aged five, have sold their two-bedroom cottage and

Ar 10.30 am the children were watching televisian because the lorries that roar past their front garden make it too dangerous to play outside.

Frances, who was brought up in the village, told me:
"We are going because there is absolutely in life here far the children. There is not even a Sunday school. There is a youth club at Garveston, two miles away. But I would not dare send them up the road with the traffic as it is. "If I want a doctor I have no means of getting to him", she said. "The nearest public phone is a mile and a half away. "The school bus comes for them both at 8.15 am and brings them back at 4 pm. They go to Hingham four miles away. It is a long day for a little for of five, having to get up at 7.30 am. She used to come home dead on her feet when the first started.

she first started. "When I was young this village was thriving. Bureaucracy has killed it."

Property values have quad-rupled in Hardingham in the past seven years and the smaller cottages are fetching £8,000 and

more. There are 16 council houses, mostly prewar. Very few private homes have been built since then, and young couples are priced out.

For Miss Kit Fricker, aged 66, who runs the Good Com-panions club for the elderly, the ailing village will expire with-out the transfusion of new

She said: "Hardingham could come back to life if more building were allowed—small houses and country cottages which people could afford. It would mean fresh blood. The villages that flourish are those where this key become of There where this has happened. There has been no new building since I have lived here, and that is 11 years".

Transport is her greatest difficulty. Every Wednesday there is a bus from Dereham to Norwich, which takes in Hardingham, and every Friday a private one runs to Dereham.

I already have to ask someon to get my pension. You cannot do anything, you are literally hemmed in. No car, and you are stranded.

There is not much left lose in Hardingham, is there This is a village absolutely dead on its feet. In twenty years' time I think a stranger coming this way will find nothing at

#### 10 hours passed before Reporter is alarm was sounded after Kappler escape

Signor Vito Lauanzio, the Minister of Defence, was frank today in admitting to the Senate's defence committee that he did not kno wexactly how SS colonel, had escaped from Rome's military hospital.

He left open the question whether Herr Kappler's wife was correct in saying that the 70-year-old war criminal had left on her arm or whether he escaped, as his guards main-tained, concealed in a black trunk. Allegations of negligence were investigated but he felt that he himself, as the minister responsible, and the Govern-ment as such, had done their duty. Implicitly he was replying to the demands that he should offer his resignation. After the discussion at the

Senats, the affair will be taken up by the defence committee of unber of Deputies and then will presumably be wound up as far as its immediate political consequences are concerned by the Cabinet on Friday.

Signor Lattanzio disclosed Signor Lattanzio disclosed that the West German Government had confirmed receipt of the Italian request for Herr Kappler's extradition which was under study. A telegram from the Italian Embassy in Bonn said that the West German Government had expressed respect for the victims of the shootings of 335 Italian hostages during the Second World War for which Herr Kappler had been sentenced to life im-

mittee that Frau Kappler was anllowed, gainst standing orders, to drive a rented car right into the hospital courtyard, making it easier to lug Herr Kappler from his ward, ride three floors down in the lift and put him straight into the car. Her husband who has terminal cancer weight only 106th weighs only 106lb. Even when a nurse discovered

thar a bundle of bewigged and jacketed cushions in his bed was not Herr Kappler, nine hours after he had fled, it took a further hour to alert cara-binieri headquarters. Signor Lattanzio blamed this on "in-decision, uncertain behaviour an da complete Jack of a spirit

Two policemen who were on guard outside the ward at the time were both charged with serious violation of orders". Signor Lattanzio said that one of them had previously been punished for slackness on guard

in charge had "on his own authority" reduced the guards outside and inside the ward because he said he did not have sufficient available manpower ".--UPI.

Gretel Spitzer writes from Bonn: The request for the extradition of Herr Kappler will be answered by the West German Government after careful examination. Herr Armin Grünewald, the Government spokesman said today. It would be examined within the frame-

#### Italian prisoners with jobs call strike

From Peter Nichols Rome, Aug 23

Reports from the prison world suggest that Thursday will bring an unprecedented strike of prisoners, some of whom work for outside em-ployers. They may be joined in their protest by cheir cell mates who do not have jobs. The list of grievances is long and touches on the interests of the whole prison population, including demands for carrying out promised reforms and withdrawal of a decree which transferred responsibility for

guarding the prisons to a general of the carabinieri. The decree was issued in May and since then a fundamental change has taken place in the system. Five prisons have been strengthened by measures of strict security and about 1,000 prisoners regarded as dan-gerous have been moved to

The remainder—some 33,000 remain in ordinary prisons under the double stimulus to good behaviour: fear of being moved to one of the five strict security prisons, and fear that they might miss a proposed

amnesty which has been under discussion for some weeks. This double pressure is believed to be one of the rea-sons why this summer was free of large-scale revolts in the main prisons. Eight men main prisons. Eight men escaped from Bergamo prison nine days ago and last night there was a brief rebellion in L'Aquila prison about the rules for using the telephone. But so far violent disorders have been

The working prisoners main-tain that the failure to apply the reforms combined with the new system of external guards imposed b ythe general are tions worse. They also allege "rea mass deportations" of rea mass deportations" prisoners with political views or associated with the trade

unions.
Their fivepage report also covers the more familiar com-plaints concerning the failure

leave, health arrangements as well as the prisoner workers' particular problems of pay and

particular problems of pay and working conditions.

They reject as "intolerable" the arrangement by which employers give them up to a third less than the normal rate for their work while the balance goes to a body which is supposed to help victims of criminal acts.

There are indications that they may find support. The regulations governing their pay may in fact, it is thought, be unconstitutional. Some misgivings are also being expressed at the impovations in the prison system involving mainly the idea of the strict security

Few people doubt, however, that something drastic had to be done to prevent the hundreds of prison escapes a year and the more fundamental. problem of the political indoc-

trination of prisoners by jailed terrorists. The answer was to chose five prisons which lent themselves to being more secure. The old Bourbon fortress of the Favignana, off the Sicilian coast, was the first known to have been chosen. Then followed the Asinara prison on an island off the northern coast of Sardinia, Trani, Fossombrone and Cuneo. Inside, the reorganization has been far-reaching. All metal objects which could be used as

weapons, such as cutlery, have been replaced by plastic; plates and glasses are of paper; beds are fixed to the ground; and four prisoners is the maximum in one cell. Their exercise hours are kept to two a day and there is a glas division when members of their family visit them.

arrangements are on two lines. The first is that in effect if not The first is that m errect if dot in theory a double prison system is being created with a somewhat ill-defined criterion for judging which prisoners should be moved to the strict security prisons. The second objection is that the whole idea is against the guiding lines of the reforms which the Governto bring the code of penal pro-cedure up to date, periods of ment has yet to apply.

#### OVERSEAS,

#### Vance . monologue at talks in Peking

Peking, Aug 23.—Mr Cyrus Vance, the United States Secretary of State, and Mr Huang Hua, the Chinese Foreign Minister, today began talks on improving relations between their two countries,

But the State Department spokesman was unable to say whether Mr Vance had more than touched on the tricky questions of establishing full diplomatic ties and the closely-linked issue of Taiwan. The Americans clearly hope for a more substantial Chinese

contribution to the ralks when they resume tomorrow. The American side regards the talks as exploratory, but Mr Vance said at a banquet here last night that President Carter was committed to establishing full diplomatic ties with Chiua.

The Chinese, however, have made it clear that such relations could only be established when the United States

severed its diplomatic and military ties with Taiwan. During the talks, which be-gan yesterday, Mr Vance has delivered what amounted to a four-hour monologue on American foreign policy. The Chinese sar silently through the first session, but the Sate Department spokesman said some questions had been asked of Mr Vance today when he dealt with Africa and Latin America.
The Chinese, who backed one of the losing factions in Angola, have bitterly attacked Soviet policy in Africa.

The American spokesman said the Chinese had also raised some questions when bilateral affairs came up later today. Mr Vance felt the session so far had been "very businesslike, very serious and verw useful." Mr Vance lunched today in restaurant that is a favourite of Mr Ten Hsiao-ping, the Com-munist Party Vice-Chairman, who was rehabilitated five weeks ago after 18 months in

political exile. Tonight it was disclosed that Mr Vance wil ihave talks with Mr Teng tomorrow. They first met when the Secretary of State

visited China as chairman of the Rockefeller Foundation in October, 1975. The American side was also touchy over questions on whether Mr Vance was likely to meet Cheirman Hua Kuo-feng. It would be a snub for the Americans i fsuch a meeting did

not take place.
On July 20, Mr Hua met Mr
Michael Klonsky, chairman of
the Communist Party of the United States.

After today's luncheon, Mr Huang Chen, the head of the Chinese lisison office in Wash-ington, showed Mr Vance round a history museum, which traces revolution and class struggle as far back as the cavemen.-Reuter.

# Mr Dayan

By Edward Mortimer Mr Moshe Dayan, the Israeli Foreign Minister, left London last night after a 24-hour visit, during which he had a two-hour meeting in the Israeli Embassy with a group of about 20 leading British Jews, to brief them on recent events in the Middle East and on the views and policies of the new Israeli Gov-

ernment. As far as is known he had no other meetings, although he gave interviews to British and Canadian television in which he to London to meet King Rusain of Jordan (who is here on a private visit), and emphasized that in peace negotiations with the Arabs Israel is prepared to discuss any proposal they may make for the future of the West

Bank of Jordan.
Asked why the Foreign Mini-ster should make such a long journey simply to brief British Jews, an Israeli Embassy spokesman said that Mr Begin, the Prime Minister, attached great importance to the views of world Jewry. He had spoken to American Jews during his visit to the United States, and now he had sent Mr Dayan to make sure his Government's

policy was correctly understood by British Jews. Sir Marcus Sieff, one of those present at the meeting, said last night that he had found

Shukri Mustapha, the leader of the sect, shouts a warning of divine retribution at the court yesterday.

#### 51 members of Muslim sect on trial

From Our Correspondenc Cairo, Aug 23 Leading members of a clandestine extremist Muslim sect went on trial here today before a military tribunal on charges of kidnapping, murder and plotting to overthrow President Sadar's regime by force.

The hearings began at a military court in Abbasseyia barracks. The 51 defendants

cuffs under stringent security measures.

The accused, including the leader of the sect, Shukri Mustapha, were formally charged with kidnapping and killing the former Religious Endowments Minister, Shaikh Husain al-Zahabi, last month, planting explosives in public places and photting to change the regime by force.

## Be My Guest at home over a mile

By Michael Seely

Be My Guest has been installed favourite at 11-10 with Joe Coral to hit the £20,000 Waterford Crystal Mile at Goodwood on Suturday. This beatuifully bred colt, who fulled to stayin the Derby, returned to his best form when alamming Poacher's Moon by four lengths over the distance of Saturday's tace at the Curragh 10 days ago and must have a great chance of making Vincent O'Brien the biggest stakes winning trainer in the history of this country.

There were only seven acceptors

the history of this country.

There were only seven acceptors at the four-day stage yesterday, but they include those tough and consistant milers, Boldboy, Don, Jellaby and Radetzky. Jellaby's trainer, Rvan Price, has also declared Duke Ellington. Saurday will also be an important day for O'Brien at the Curragh. His impressive Ascot winner, Transworld, and Valinsky have been declared for the £5,000 Blandford Stakes. His Coventry Stute: winner, Solinus is one of three Cashel trained acceptors for the £4,000 Anglesey Stakes.

The hunt to fing a posible Eng-

Anglesey Stake...

The hunt to find a posible English trained candidate to repel the foreign challenge in next year's 2,000 Guineas is now on with a vengance. Persian Bold blotted his copybook when only third to Swinging Sam at Kempton last Friday. Although Peter Walwyn's Northfields colt, Antier, revealed himself as a two-year-old ot some potential when scoring in great style at Kempton the fullowing afternoon, Sexton Blake, Swinging Sam and Bruce Hobbs's pair, Tumbledownwind and Royal Harmony, are the most promising of mony, are the most promising of the home contingent at present.

Michael Phillips was in Deauville last Sunday and saw Super Concorde's victory in the Prix Morny. He was deeply impressed with the two-year-old apearance and style of racing. Dalwyn, who fell in love with the American-bred as a

yearling at Keeneland and would have purchased him if he had been able to find a buyer, was also im-mensely taken with the whole per-formance. The important autumn tests at Dancaster and Newmarket-will constitute the final rial of reports between he home team and

The accent is on the two-year-old racing at this afternoon's three meetings. No colt of classic potential wil lbe on view, but Henry Cecil is introducing a highly regarded filly called Saintly Angel, in the hall Quay Stakes at Great Yarmouth.

Yarmouth.

A daughter of So Blessed, Saintly Angel is reported by our Newmarket correspondent to be working better than Housey Bridgn, who was only narrowly beaten by Sistus at Newbury. She faces a suffitask on her first appearance as Tom Jones's Rose Girl, a half-sister by Thatch to that smart sprinter Rambling Rose is rated superior to Monday's Windsor winner, Saltation in their gallops together on the heath. But I shall stand by my news of Saintly Angel.

The day's most valuable race is

Angel.

The day's most valuable race is the Buggins Farm Nursery Handicap at Haydock Park. This event's chief claim to fame is that it was won by the 1952 Derby winner. Tulyer. It looks an exceptionally compenitive affairs. Despite the fact that there are eight previous winners in the race, Ekels Pride must have an outstanding chance of landing this £3,000 prize with only 7st 5lb to carry. Henry Candy's two-year old has run welf in all his four races.

Last time out at Sallybury. Ekels

Last time out at Salisbury, Ekels Last time out at Salisbury, Ekels Pride was beaten under three lengths when fourth to Shorthouse and Shapina. As Shorthouse is strongly fancied to win Friday's Waterford Candelabra Stakes at Goodwood, and as Shapina was under three lengths behind Enstune Spark in the Lowther Stakes at York last week, the

the Salisbury running.

Beverley also features a twoyear-old handicap, the £2,500
Beverley Silver Salver Nursery
Handicap. Barry Hill's Top of
the Class heads the weights and
Guy Reed's Warpath filly, Sioux
and Sioux, will be trying to take
her Eith race off the reel. Edward
Hide's mount, Reparation, has
shown consistent form for Ernie
Weymes having won two of his
last three races, But I shall take
a chance with Paul Kelleway's
Grunty Fen, who was unlucky in
running when third to Gay Herald
at Brighton.
Perhaps the best bet today is

at Brighton.

Perhaps the best bet today is John Winter's three-year-old, Don Amigo, in the Cobham Stakes at Great Yarmouth. Don Amigo has been working cinsistently better than that useful handicapper, Lucky Mickmooch at Newmarket. The Relko Colt should prove too sharp for Night Porter and Showboard, who should give a better account of himself now that the ground has eased. That successful raider of the Suffolk course, Tim Moloney should score with Malgatti who has sidestepped his engagument in the big race at Havdock to run in the Royal Nursery Handicap.

Viren fit for Finns

004322

Helsinki, Aug 23.—Lasse Viren runs in the 5,000 metres for Finland in their athletics international against Sweden in Stockholm next weekend. Viren has been suffering from a leg injury and was not included in the Rest of Europe team for the world cup

Smyth sets sights on lucky race again

Ron Smyth believes that the Cesarewitch is a lucky race for him and considers that he has a candidate for the Newmarker stamina test in Fast Frigate, who at last hit winning form in the Jim Taylor Memorial Handicap at Brighton yesterday.

Philip Waldton kept Fast Frigate among the back markers until the top of the hill then gained a good position as Baroncroft led the field over to the stands slide. Perucio headed the leader a furlong out, but could not answer Fast Frigate's perfectly timed late challenge.

Smyth said: "Philip did well, I told him not to produce the horse until the last one and a half furlongs. I saw Fast Frigate run so well at Epsom earlier in the season that I thought he'd like this track. He will be entered for the Cesarewitch. I think he wall stay and he cerminly has a good turn of foot. I have not had many runners in the big race and won it in 1973 with Flats Level

good turn of foot. I have not had many runners in the big race and won it in 1973 with Flash Imp.

"It's nice to come back here and win a race with no its and buts", Clive Brittain, the trainer, said after Blesed Soandso finished too strongly for the favourite, Filley Green, in the Coldean Stakes. Earlier in the day Brittain had heard the stewards of the Jockey club dismiss his anpeal over the disqualification of another of Captain Marcos Lemos's horses.

the disqualification of another of Captain Marcos Lemos's horses, Monte Acuto, on the course 20 days earlier.

"This makes up for it", Brittain said, "Blessed Soandso deserved this for he was knocked after two furiouss last time out at Ayr and went from first to last." The winner was partnered by Edward Ride, who takes over as Brittain's first jockey next

Blessed Soandso wins the Coldean Stakes at Brighton

season. This was his first success season. This was his first success over the course since 1970.

George Peter-Hoblyn, whose stable is in good form, saw his bargain purchase, St Terramar, score for the third time when catching Ardent Runner in the last few yards of the Grange Nursery. He said: "St Terramar has only picked up a small penalty so will run at Chenstow on Monnee only picked up a small penalty so will run at Chepstow on Monday". The 2-1 favourite, Supergas, ecleted to race alone on the far rails from the top of the bill and was left trailing in the final two furlongs finishing next to last, nearly 18 lengths adrift.

Answer by a length in the St Ann's Well Stakes, "I have Ann's Well Stakes. "I have entered Balidon for the Cambridge-shire and if all goes well he will run in it". Svd Woodman, the trainer, said, adding: "This is the first time he has stored fur two years and remember he was a good juvenile. The ground was too hard fur him last season and then this year he had pharyngitis and that was only cleared up after and that was only cleared up after he went to the Newmarker Equipe research centre two months ago."

#### **Balding's** appeal is upheld

The appeal by Toby Baiding, a Hampshire trainer, against the dis-qualification of Somersel by the full transfer of Somersel by the Folkstone stewards last week has been upheld by the Jockey Club stewards in London. It is only the second time in recent years that a decision by local stewards has been overruled by the Jockey Club.

Somersel, partnered by Robert Somersel, partnered by Robert Weaver, nassed the post three lengths ahead of Willings Hope in the £560-to-the-winner Sandling Selling Handicap; but after an objection by George Duffield, who rode the runner-up, the placings were reversed by the stewards because of alleged interference by the winner had said at Folkestone:

"The decision was disholicat.

"The decision was diabolical.
Somersel was clear in a few strides, and it made nor the slightest difference to the eventual outcome." His appeal against the decision was sustained by Jockey Club stewards, who after viewing the camera patrol film of the race, and hearing evidence the race, and hearing evidence from Weaver and Duffield, rule that the interference was accidental, and that it had not affected the outcome. They ordered that Somersel be placed first and Willings Hope second.

Somersel be placed first and Willings Hope second.

Balding, a leading member of the National Trainers' Federation: is on family business in Scotland and missed the hearing. His assistant, Rolf Johnson, said: "We are delighted. I was most impressed by the professional way the stewards carried out the hearing."

Somerset may be in action again at Goodwood on Friday in the Rookwood Apprentices' Hardicap, for which Balding confidently declared a penalty in advance. In general, apneals meet with little success when they come before the Jockey Club stewards, and are usually dismissed. The only other successful case in recent years was after an apprentice handicap at Ayr in July, 1875.

The Jockey Club stewards also heard am appead by a Greek shipping magnate, Marcos Lemos, whose colt, Monte Acuto, was disqualified for interference after winning the £1,280-to-the-winner Lanes Stakes at Brighton on August 3. But after seeing the parol film, and hearing evidence from Monte Acuto's trainer. Clive Brittain, and the jockeys, William Carson and Brian Rouse, they dismissed the appeal

## Greenwood preaches a little humour

By Norman Fox
Football Correspondent
Ron Greenwood, the "temporary" England manager, yesterday revealed his desire to bring about a new "collectiveness".

Although his appointment is for a mere three matches, two in the World Cup and one a "friendly", he clearly sees his task as the foundation work in the rebuilding of the team on a club basis. On Saurday he wanched Liverpool and spoke to their nine England internationals, and yesterday he left the impression that he saw no reason against playing them all.

In his first press conference since succeeding Don Revie, whose name neither he nor any Football Association official mentioned in nearly an hour's discussion, Mr Greenwood emphasized the importance he attached to having players who were on the same "wavelength". He said: "The secret of being an international pilayer is to be able to improvise and adapt " and from everything he said there is reason to think

likely to go

on at Wembley

he would be delighted if the FA asked him to develop. His ideas after his period of temporary courtol.

Explaining his own position, he said: "Being a blunt Lancastrian, I asked the FA, when I accepted the job, if they did not to have someone just to soak up all of the punishment for the next three matrines and if they had anyone in line to take over after December." Although he saw the three matrines as his "sole objective" he added: "I do not think there would be any impediment as far as West Ham are concerned if I was asked to continue." Later the FA chairman, Professor Sir Harold Thompson, said the full list of applicants had not yet been made and that the future would be discussed more deeply in the months ahead.

As well as hoping for "collectthe job, if they did not to have someone just to soak up all of the punishment for the next three matches and if they had anyone in line to take over after December." Although he saw the three matches as his "sole objective" he added: "I do not think there would be any impediment as far as West Ham are concerned if I was asked to continue." Lart the FA chairman, Professor Str Harold Thompson, said the full list of applicants had not yet been made and that the future would be discussed more deeply in the months ahead.

As well as hoping for "collectiveness" among the players, he wanted to spread some humour. He admitted to being as serious about football as anyone but said: "I will be in charge of the senior team although I would love to be

we tend to create intensity within ourselves. Since I gave up at West Ham as team manager I think I have learnt that we need a lightheadedness. The players I have spoken to said that when Joe Mercer was caretaker manager there was a nice, happy spirit I title England squad."

Mr Greenwood's great interest

involved with the under-21 and youth squads. At this stage that is not possible. Les Cocker will remain with the under-21 squad for the next two matches." He did not feel it would be right to change any of the officials who assisted Mr Revie. change any of the officials who assisted Mr Revie.

After saying that if it were possible to be successful in such a short period he admitted hoping to "creare a team that could be there for a time".

Sir Harold Thompson said: "We have chosen a man who is responsible; one who has mought it all out. If he loses all three matches we will still say we were right in our choice." Ted Croker, the secretary of "" "jointed out that the decision of the association was to appoint a temporary manager and then to advertise. At yesterday's conference Mr Greenwood was always careful not to talk of the long term, but there is no doubt that the FA feel that they have chosen a man of principle and would probably be pleased to retain him.

Wales's home tie | Keegan blames poor form Leeds say they will not hold on playing centre forward Hamburg, Aug 23.—Kevin Keegan, the former Liverpool player who has yet to score after three league matches for his new club, SV Hamburg, blames his lack of success on being played out of position.

Keegan, who joined the West German club for £500,000 after he helped Liverpool win the European Cup, said: "I have never played centre forward and if they put me in my old position for a month I would show the Hamburg public what I'm worth."

Keegan apologized to his teamburg public what I'm worth."

Keegan apologized to his teamburg public what I'm worth."

Keegan apologized to his teamburg public what I'm worth. Hamburg liost 5—2 away to Dmisburg. Aithough he has improved since that match—Hamburg won the next two—he has yet to put his name on the scorers' sheet and critics feel he would be more effective playing in an attacking midfield position.—Agence-France Presse.

New York, Aug 23.—Ticket sales for the New York Cosmos semi-final roomd game against tomorrow night are near the 75,500 sellout mark. The record attendance for a soccer game in North America was set at the last to Cosmos home game in the North American league play-offs when 77,631 spectators packed the giants on to Frank Gray

Frank Gray, Leeds United's Scottish under-23 international who told his manager, Jimmy Armfield, that he wanted a move because he was not in the team at Newcastle on Saturday, had his request granted yesterday. request granted yesterday.

After Mr Armfield had reported the matter to a board meeting at Elland Road he said; "If anybody wants to go they can go and the board are in full agreement with me. I told Gray that because he was left out of the match at Newcastle, when he was substitute, it did not mean he was out for the rest of the season. Indeed he could beplaying against West Bromwich tomorrow night and I told him that I had been fair with him."

Leeds will want a six-figure fee

nowiest, and suggestions of help for spin later, though no more than is proper in a three-day march.

At the start of play, Gloracestershire were 59-5, 30 behind Warwickshire on the first innings. They were all our for 79. Willis took the first seven wickets, and finished with eight, and his best figures in first-class cricket. It was an accomplished piece of truly fast bowling by a man who is, at present, full of confidence in himself, and looking forward to bowling the Anstralians out. Once he had Procter out, in his first over, there was not much to stand in his way.

When Warwickshire were in sgain Bezin took three quick wickets: Abberley caught at short leg, Whitehouse at short mid-offgood catches—and Kallicharran leg before. Kallicharran appeared to be in no sort of form in this match. But Amiss, who had efficiently taken the burden of Procter's first spell, settled into a comfortable innings, and soon it was a question of when Warwickshire would declare. After losing a few wickets by vague swishes, they did so at ten past firee. This meant that Gloucestershire had to score 222 in 140 minutes, which was likely wantwickshires; First lingures, 139 (R. N. Abberley 58; M. J. Procker 6 him."

Leeds will want a six-figure fee for him, but Mr Armfield said that he would be prepared to consider a play-exchange deal for Gray, who is the younger brother of Eddie Gray, also of Leeds. David McNiven, a 21-year-old striker who has asked to come off the transfer list, will be told of the board's decision today.

BRISTOL: Gloucestershire (4 pts)
drew with Warwickshire (4).

A win for Gloucestershire
would have taken them much
nearer to the championship on
which their hearts are set, but
it never looked probable. Not
that they are out of it. A Middle
sex man, who happened to be in
Bristol, thought it had been a
splendid weekend.

It was a lovely day, sun and a
little breeze, and a substantial
crowd—well, substantial for a
They thickened after lunch—not
so much as they would have done
at Edghaston, but then Edghaston lunches are larger. The pitch
had dried well. There was a
touch of early help for the fast
bowlers, and suggestions of help
for spin later, though no more
than is proper in a three-day
match.

At the sizert of play, Glouces-

to work our at about five and a half to the over:
There were Gloucestershire supporters, not all the ruder kind fledges final, who felt that Kanhal's declaration was too sever. I did not share this view. Gloucestershire had to have a try, however still the proposition. Also, there are 15 other counties in the competition. Also, there was not much above a day and a half's play in this match. Also, there was not much above a day and a half's play in this match. Also, there was not much above a day and a half's play in this match. Yorkshire gained a thrilling victory by five wickets over Lancasbire after a day of fluctuations. In Lancashire's dramatic dismissal for 108 in the second innings, Yorkshire's spin bowlers operated effectively with Carrick taking six wickets for 37 and Cope, three for 28.

Yorkshire were left to make 177 in 134 minutes plus 20 overs and effer Lendbeater's dismissal at 1400, Boycott (35) and Hampshire (34) belped Lumb to add 78 and 76 for the second and third wickets respectively.

Lumb's 77 (eight fours) in 182 minutes was an outstanding feature and was his higgest limings of the season.

With Imman Khan taking five wickets for 51, his best figures since joining Sussex, and Javed Mismdad scoring 109, his third hundred of the season, the final day of this match was dominated by Pakistanis.

In spite of this pair's best efforts, Sussex had to be content with maximum bowling points against Hampshire from a game which lost nine hours through the weather in the first two days. weather in the first two days.

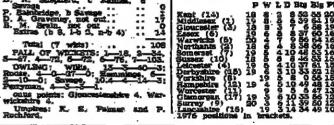

Nottingham
Gaham Roope with an unbeaten
110 helped Surrey to a draw
against Notificationshire. He scored
his century, which included a six
and 12 fours, to three hours 20
minutes. He shared surpontant
partnerships of 75 with Includes
and 66 with Arnold, frustrating
Nottinghamistics's tooses of
achieving their first championship
victory.

Chatter field

caith, from Hignell or Procter or Shepherd.

These prospects rapidly disappeared in a few minutes after tea. Hignell was out almost at once. It was Procter's turn. I caught a gimpse of his face as he went in. He looked determined, but a little weary, and worn, and sad. He was out drawing, driving too soon, an unusual fault, because part of his mastery in his fast accres in the past have been, if it was at all conceivable in the circumstances, to take an over or two to play himself is. Shepherd, shortly, was also out, and thereafter it became a matter of whether Gloucestershire, with willis bowling again vigorously, could save the match. They did this without much difficulty in the end, though Warwickshire claimed the extra half hour. Chesterfield
A patient and unbeaten 67 from their opening beaman Boprington, sherred Denorshire to victory over Woocestershipe in a match which was reduced to a single imminus comest because rain washed out the first two days.
A splendid 53 not out by D'Otiveira enabled Worcestershire to declare at 167 for seven, Hendrick taking four wickets for 19. The declaration left Derbysinire with only 50 minutes plus 20 overs. They began badly, losing three wickets to Inchmore in reaching 67, but Borrington held them together. Chesterfield .

our capacity to the required 25,000 in time for the game Wembley have already said that they would be prepared to stage the game, which they reckon would attract a crowd approaching 70,000. The Welsh committee meet

The Prime Minister was condemned yesterday when Wales finally gave u phope of staging their World Cup qualifying match against Scotland at Nimian Park, Cardiff, on October 12. The match, which Wales must win if they are to stand a chance of reaching the finals in Argentina, looks certain to be switched to Wembley.

Stefan Terlezki, the Cardiff City chairman ,criticized Mr Callaghan—Ninian Park is in his constituency—Denis Howell, the Minister for Sport, and the Welsh Office for a lack of "interest" and "sympathy".

Under the Safety of Sports Grounds Act the Cardiff attendance was cut by the South Glamorgan County Council to 14,050 and the Welsh Football Association had said that they would take the game elsewhere unless that figure were raised to at least 25,000.

"This is the saddest day in the hisbury of Welsh football", Mr Terlezki said. "The capital city is being belittled by an Act of Parliament. What saddens me is that hardly any interest or sympathy has been shown by these people, and they would be just as little interested if we would have to go into liquidation in the next mouth or so."

The Englishman away who is the envy of the Englishman at home

## Senhor Mortimore, leading light of Lisbon

ships the luckless England team-started by losing to Portugal by 19 goals to 1, and ended the tournament in the humiliating position of eighth out of eight, losing all their matches. But that weekend, in a remore border town, Portugal's most celebrated Englishman checked into the only hotel on his way back to Liebon Engistaman Checked into the only hotel on his way back to Liston with his daughter. Within half an hour the hotel lobby was seering with journalists, demanding to know why he should have honoured their town with a visit, and the local radio station was insistent that he should favour them with an interview on the them with an interview on the subject of his holidays, Having spent three quiet and unrecog-nized weeks in England, John Mortimore knew he had come

sultation with our contractors we have had to inform the Welsh FA that we will not be able to raise

Mortimore is about to begin his second season as trainer of Benfica, the pride of Lisbon and, in the 1960s, one of the wonders of the sporting world. He is in his early forties and has been a manager in the Football League for just one season, which he spent with Portsmouth, in between assignments in Greece. Although he is largely unknown in Britain the prospects of any British manager wishing to work in Europe will be crucially affected by the degree of success he attains in Benfica.

"It is hard to describe just

"It is hard to describe just how different this job is to managing in England. What I do here is to train the team; I am entrely responsible for what happens on the field. That is my job. In England the manager runs the office, acts as public relations man, attends board meetings, and in general concerns himself with most aspects of what happens in the club. As a result, he rarely leaves his desk and can't be expected to work with the players. That is why most English managers have trainers or assistants to work with them—look at Tony Book at Manchester Ciy—he retired as a player long after I did, but he employs Bill Taylor to coach the team. At Benfica there is a football department who handle all the administration. I have a football director who deals with contracts and all the finance. I am left to work with the players, which is what I do best and what any manager likes to do best. If we fail as a team then I will be blamed, just like in England, but at least here it will have been all my own work." " It is hard to describe just

By "fail" Mortimore means failing to win the league. Portuguese football is rather like Scottish—two major clubs, Sporting Lisbon and Benfica in the nation's population centre, who share the spoils between them and have an automatic passport to Europe. In his first season Mortimore did what he had been hired to do want he had been hired to do-Benfica won the league in front with a 4—0 win over Beira-Mar-in the Stadium of Light. Morti-more was the hero of the hour. But still he believes that winning the league is not enough.

were ready to lyuch me on the terraces when we failed to win any of our first four games. Still, I think that one of the reasons him one thing—" In this job, that Continental clubs hire English coaches is that we do have any of our first four games. Still, I think that one of the reasons that Continental clubs hire English coaches is that we do have a reputation for thinking of the club as a whole, not just the first team and the enext result. I remember the day after I started work here; I went to watch the youth team play on a Sunday. They were—amazed no trainer had done that here since Jimmy Harap." that here since Jimmy

Hagan."
The respect that Hagan commands in Portugal is the main reason why Benfict decided to replace the volatile Brazilian, Mario Wilson, with an Englishman. Hagan had coached Benfica from

by communicating in the language of football. 1970-73, winning two championships, but resigning when he felt that three of the most famous players had not been working bard chough to deserve selection for Eusebio's testimonial. The board insisted that they should play; Hagan cleared out his desk.

Three years later he recommended Mortimore for the post and was dismissed as trainer of Sporting Lisbon a few months ago when his team surrendered a sixpoint lead in the championship to Mortimore's Benfica, who played their last 25 games without a defeat. Such are the oddities of football. Exactly how Mortimore got the position, though, is an instructive parable in the erratic ways Continental clubs run their affairs.

He had played for 10 years with 1970-73, winning two champion-

ways Continental clubs run their affairs.

He had played for 10 years with Chelsea, mainly as a centre-back, ending up in the Chelsea team that gained promotion under Tommy Docherty in 1963 and went on to take the first division by storm. Reluctantly retiring with a broken law after a few months with Queen's Park Rangers, he became coach to Sunderland, and then assistant manager at Southampton. In 1971 he left the calm waters of the south coast to seek his fortune abroad with the Greek club, Ethnikos, returning in 1973 to manage Portsmouth. That season was such an unpleasant experience, with perpetual interference from "To achieve anything worth while as a coach you must build something that will last more than just a season or so, so I spent last season bringing younger players into the team, and the gamble paid off. We won the league, and we now have a team with much stronger prospects than the one I inherited. But they

FA to inquire who is available. Among the names they are given are Bill McGarry, Dario Gradi, Tony Walters and Mortimore. Ony the last-named has any experience of training at foreign clubs, and so, with a minimum of experience at the highest level, Mortimore gets a position that must have turned even Don Revie green.

"Foreign clubs s ee Englishmen as honest men, firm on discipline "Foreign clubs s ee Englishmen as honest men, firm on discipline and fitness, neither involving themselves at board level nortolerating interference. If we have a weakness it is incitical. Tactics are the big thing here, and English managers are very weak at this level. Also, they have no experience of making creative use of two substitutes. something that of two substitutes, something that is second nature to Continental

He might have added that not speaking the language is a problem, but in truth it has many advantages. Mortimore is free from getting dragged into internal politics in the club; he can effortlessly maintain distance between himself and the players; and he does not care much what the Portuguese press say about him, so he does not saffer from the tight-lipped paramoia of some colleagues at English clubs. He arrived two years after the revolution unseated the 46-year dictatorship, but takes little interest in politics. His appointment, however, is affected in two major ways. First, Portugal has a system of freedom

Long. J. Somers and H. G. L. Choune did not ber. McRETS: 1-50, 2-68, 3-134 4-212.

BOWLING: Elms. 21-3-77-0; Rice. 25-6-77-1; Daylor, 18-16-77-1; of contract which allows for no compensation whatever if a player leaves a club on expiry of his-contract. The club can obviously induce the player to stay by offer-ing better terms, but this summer ing better terms, but this summer Mortimore has lost three players from his championship-winning team when the football department refused to give in to their demands. Unlike an English manager, he has no executive control over comracts. His work is made harder by the fact that no transfers between Portuguese clubs are permitted during the season. Other clubs get round this by signing foreign players is support and form are drooping around Christmas; but Benfica, like Yorkshire Cricket Club, have a policy of never signing foreign players.

Mortimore's task is made

Mortimore's task is made harder still since many players who counted as Portuguese before who counted as Portuguese before the revolution were, in fact, subjects of the colonies, Angola, Guinea and Mozambique, where Eusebio, after all, came from. These are now fully independent stares, and although two members of Mortimore's first team who are former colonials can opt for Portuguese nationality when they are 21, if they do they will end up in the army. Since Bensica's main objective is to win a European Cup against teams who do not tie one foot behind their back, and will let anybody play for them, this seems a peculiar policy, but that is Mortimore's only complaint.

Otherwise, nothing is left to

Otherwise, nothing is left to chance. They have two full-time maseurs, a doctor in constant attendance, and their medical facilities are second to none (and better than many Portuguese hosfacilities are second to none (and better than many Portuguese hospitals). One of Mortimore's players—"he's a bit of a head case"—visits a psychiatrist. They cruise around in specially-designed coach, or they fly, even inside Portugal. It was at the windy Porto airport on a cold February Sunday that Mortimore was told that he would be offered a new contract, this time for two years.
"I was played Normally Con-

And what does this vote of confidence mean for Mortimore, the man who has never managed a first distsion club in Britain, but is the envy of managers who permanently, and it means two more years of boarding school for his daughters.

World Student Games

## Andrews wins third track gold medal for United States

By Noel Hughes

Sofia, Aug 23.—Only Tom
Andrews, of the United States,
stood against up against Eastern
Europe early in the final session
of the athletics compedition at the
World Student Games here tonight. Andrews burst through and
won the 500 metres hurdles final,
but Eastern Europe scooped up
the other five gold medals
awarded in the first half of the
last day's competition. last day's competition

The compactly-built Andrews, from Los Angeles, California, came through after the final hurdle to catch Klaus Schonberger of East Germany, with the West German Rolf Ziegler taking third place.

"I'm tired after all that".
Andrews said. "But I'm in good shape and I'm heading for Zurich tomorrow to join up with the US World Cup team."

World Cup team."

Andrews had a time of 49.52 secs, a new games record, and the Americans might have taken first and second place. James Walker of the United States, was in a photo with Schonberger, only to the disqualified fro dragging his age at the second hurdle.

The victory by Andrews was the mird gold medal for the United States, still far behind the Soviet Union, who were predictably alloping clear at the top of the

nedal table. Enn Sellik, o fthe Soviet Union, on the 5,000 metres and another

Russian victory came from their nen's sprint relay squad. Totta rerow, of Bulgaria, took the gold nedal in the women's 1,500 metres and Emaniul Dulgerov, of Bulgaria, won the hammer final. Hose! Plachy, of Czechoslovakia, hwarted Britain's main hope for gold medal, Mike Kearus, in the men's 1,500 metres, with a riming time of 3min 40.2sec. Gearus took the silver medal in 140.3 and the Algerian, Abdelshmane Morsell, was third in 141.0.

Kerros, a 23-year-old student at fraingham University, failed to et in the right place at the right me and paid the penalty. There as some bimping and elbowing us before the start of the last lap ithe field jockeyed for position by though the British record aider extricated himself he was table to match the quick striding achy.

isble to match the quick striding achy.

In the race for the line, it oked as though the Algerian was ling to hold on to second place, the result of the second.

If it is should have been in second are on the bend," Kearns said.

I tried to go for second in the ck straight, but I was pushed out postrion and I just wasn't in the

position and I just wasn't in the fir place. "I would have been much er if I had kept my position

#### Shinnecock course in favour of Britain

By Peter Ryde Golf Correspondent

Twenty two victories to the United States, two to Britain and Ireland, and a tie at Baltimore in 1965; yet once again the Walker Cup fever mounts and speculation arises as to whether for the third time the impossible might not happen on Friday and Saturday. Both our victories came at St Andrews, in 1938 and 1971, and since most Americans, apart from the actual team, would not mind seeing us win again, it is not surprising that they have this year picked a site not unlike St Andrews, or at least as near to it as one could ever get in the United States.

it as one could ever get in the United States.

Lying along the Atlantic seaboard at the fashfonable end of Long Island, Shiunecock Hills can claim to be the cradle of golf in that country, although such claims are always dispouted. It is the nation's oldest incorporated club, dating back to 1891, one of the earliest to have eighteen holes, and it was one of five charter members of the United States Golf Association. It is certainly steeped members of the United States Golt Association. It is certainly steeped in tradition and that alone would make it a suktable place in which to hold a contest in which senti-

Kerstin Ehrnlund, the 18-year-

Kerstin Ehrnlund, the 18-yearold Swedish champion, caused the
surprise of the day when she beat
Gillian Stewart, the defending
champion, to reach the last eight
of the British girls' championship
at Formy Ladles yesterday. Miss
Ehrnlund was in control after winning three of the first six holes.
She was still three up after 11
holes, but Miss Stewart came back,
taking the 12th and 14th, where
she holed out from 15ft for a
birdle three. But she drove into
the heather to lose the 15th.

birdle three. But she drove into the heather to lose the 15th.

Then, after winning the 16th with a birdle two, Miss Stewart was again in the heather at the 17th and lost the match. Wilma Aitken, the Scotnish girls' champion, produced the day's best figures, being one under par when she beat Philippe Barry by 5 and 3 and was level par when she scored a similar win against Barbara Wilson in the fourth round.

Susan Bamford, the 17-year-old

bera Wilson in the fourth round.
Susan Bamford, the 17-year-old
English girls' champion, also
reached the last eight. Miss Bamford was not at he roest on the
greens but won through on the
17th against Linda Batty, a Yorkshire county player, who earlier
in the day beat Susan Rowlands,
last year's losing finalist.

**Defending champion goes** 

out in fourth round

in the events that were held there, and in 1896, the only vime the Amateur championship was held there, the length of the course was less than 4,500 yards. Dunn won the Open there which, as in the early days in Brizan, was held during the same meeting, a mere afterthought to the Amateur.

Since then length has been added. This wek it will be played somewhere near its full length of 5,700 yards, short even by Walker Cup standards, but still considered a fine test though one that is seldom used for leading events because of its inaccessibility. This in spite of the fact that it is not over 100 miles from New York.

The parallel with St Andrews is not an exact one for the course is not rue linkshand. It has undulating ground, dunes and thick infits of grass, and is exposed to wind as all good links should be. Thus har the 10-man British team and their captain, Sandy Suddier, will feel at home. But the texture of the fairways, as in so many cases of seaside courses these days, is inland in nature. The premium, and again this is more a British characteristic than American, is more on the correct placement of the drive; the fairways are narrow, the rough gras wiry and the greens, specially at the shorter par-four holes, well bunkered.

When the great Hogan played the course in the sixties he gave

to hold a contest in which sentiment plays a big part.

The original course was laid out by a Scot, Willie Dunn, at the request of one of the Vanderbilts who found him and golf while on boliday in Riarritz. Seeing Dunn play golf the American is reported to have made a remark which must be the under-statement of that or any other century: "Gentiemen, this sure beats rifleshooding. It is a game I think might go in our country", and he took Dunn back home with him to build Shinnecock. Scoring was low

Rowing

#### Seven chances of British finalists

By Jim Railton

Britain's rowing crews competing here in the sixth world championships, had only stwo crews on the water today fighring for their lives in the repechages. They came through once again with flying colours. Britain's single sculler, Tim Crooks, won today's repechage sculling comfortably ahead of Svenson of Sweden and these were the only two to qualify in the race. Christie and MacLeod finished a comfortable second in their repechage in coxed pairs, with three to qualify in the race, with Britain only one length down on the streng Romanian crew.

So Britain now have two crews for the final rounds (the men's lightweigh eight and Baillieu and Hart in the double sculls) and seven in the smi-final rounds with a glimmer of some of these making further progress. But all is on course and going well according to play here.

"Going to plan", was exactly how Crooks' coach, John Pilgrim-Morris, described his charge's victory today. Three scullers contested the two available places. Svenson the Olympic seventh placed Ibarra (Argentina) and Crooks. Ibarra made the running, but he has never improved technically and it was clearly only a matter of time before he fell victim to his pursuers. Crooks took command just past the 1,000 metres. In a flash he was a length clear of Ibarra and, with Svenson now as his escort, cruised magnificently to take the race. Dreifke (East Germany), Dovgan (Soviet Union), Karppinen (Finland), the Olympic champion, and Biondi (Italy) wem through first time in their heats last Sunday.

Apart from Crooks and Svenson; Sean Drea (Republic of Ireland), Hansenof Norway, the Olympic double sculls championship promises an exciting final and I still think Crooks could be well in at the kill.

net tightens with repechages and semi-final rounds for women and men's lightweight crews on Thursday and the men's heavyweights on Friday.

Britain's women's team will now come under their greatest pressure and could be the first casualties of the regatta from a British point of view. While Astrid Ayling and Pauline Hart stand an exceptional chance of reaching Saturday's final. Lyn Clark and Beryl Mitchell, in coxless pairs, together with the women's coxed four and coxed quadruple four, face difficult répéchages with only the first two moving forward to the final rounds in each case.

Britain's women's double scullers meet the Netherlands, west Germany, Poland, Hungary and the United States in their semi-final, but have demonstrated their class here already with a fine run in the heats to finish second to the Bulgarians. Lyn Clark and Beryl Mitchell. Britain's coxless pair, went off far too fast in ther heat tast Saturday and consequently paid the penalty with poor steering, mainly from fatigue, in the last half of the

seouently paid the penalty with poor steering, mainly from farigue in the last half of the race. They finished fourth out of the five crews. With only two to qualify for the final in the repechage on Thursday Clark and Mitchell meet Bulgaria, the United States and West Germany. They face a formidable task.

On Thursday, Brimin's lightweight sculler, Zeun faces a tough semi-final round which includes weight sculler, Zeun faces a tough semi-final round which includes world lightweight champion, Raimund Haberl of Austria and two former World medal winners in this category in Reto Wyss (Switzerland) and Harold Punt of the Netherlands. To make the final six, Britain's Zeun, will have to produce something special for

to produce something special for he has hardly impressed with his performance so far. With Britain's lightweight eight with british is against against already in Saturday's final, Britain's lightweight coxiess four stand a good chance of reaching the final six, but to do so must finish in the first two against

Ar the International Rowing Federation's general congress today, there was discussion over the massive at lift and difficulties of holding the next World championships on Lake Karapiro m New Zealand at the end of October 1978. The high cost of sending teams and their equipment together with the lengthy time required for acclimatization may result in a small entry, but the New Zealanders are keen that the whole operation should be an outstanding success.

The Caymen Islands were admitted to the International Rowing Federation, and behind that move was no other than your

that move was no other than your former rowing correspondent. Douglas Calder, who is now resident there.

#### Yachting North's protest criticized

Newport, Rhode Island, Aug 23.

Lowell North, a California sailmaker and skipper of Enterprise in the America's Cup yachting trials here, has been criticized for his handling of a protest against his rival American skipper, Ted

by committee

ins nanding or a profess against his rival American skipper, Ted Turner.

North lodged the profest against Turner and his yacht Courageous last week, accusing the Arianta businessman and baseball team owner of halling "mast abeam" prematurely and forcing Enterprise to veer off.

The New York Yacht Club protest committee wrote off North's protest by saying: "While there was a conflict in the evidence relating to the timing of the first half of "mastline" [mast abeam], it was found not to have been premature. The protest is therefore disallowed."

The committee found no fault with Turner, whose Courageous has by far the best won-lost record in two months

#### Condor eligible for round the world race

Scrutineers in the round the world race, sponsored by Whit-bread, have been told that Robin Knox Johnson's 77t, Mahogony planked yacht Condor is eligible for the race after all. There were fears that a twoft penalty would be imposed on his handicapping because the finely tapered orange-painted carbon fibre mast would take her over the 70th handicap limit. The penalty for using "exode material" was put at three per cent, giving her a handicap figure of 71.3. The remeasuring came up with a new figure including the three per cent penalty, of 58.7.

The handicap worked out in the georie weather as the newly-built Condor prepared for the Fastnet race, is still subject to correction by computer. Condor, a development of one of the racers in the last Whitbread epic four years ago, is tipped as the likely winner.

The fleet of 15 boads sets out on Saturday for Cape Town.

Swimming

#### Miss Hill wins by almost six seonds

Deborsh Hill, one of Britain's leading sprinters in recent years, won the longer senior 400 metres free-style in the national age group swimming championships at Blackpool yesterday. Miss Hill, who represented Britain in the 100 metres at the world championships two years ago and the Olympic two years ago and the Olympic Games in Canada last year, won in 4min 33sec.

Games in Canada last year, wow in 4min 33sec.

She was in such commanding form that she had almost 6sec to spare on Kim May

#### Back in fashion with a new character

by John Young

was never likely that Brighton would go the way of other English seaside all its hopes to nourism. resorts. Its architectural splendours, combined with

fashionable watering place, and when it was in danger of acquiring a somewhat sleazy image, frequented by racecourse thugs and shabby detectives earning their fivers by posting themselves in hotel lobbies. Graham Greene's portrait of Brighton in the 1930s is not an attractive one; but when did Graham Greene ever enghuse.

package tours to Spain began to supplant the traditional formight at the seaside, it is seemed headed for lean times. It was rescued by a number of factors, including political conferences, an influx of London commuters and the unforeseen enthusi-asm of foreign visitors.

asm of foreign visitors.

Since then Brighton has steadily capitalized on its advantages, and in the process has broadened and expanded its character with its superb situation between the downs and the sea, it is probably the nearest thing Britain has to the great continental resorts, and yet has a commodation, vacant units of more than 30,000 so fit. Britain has to the great con-tinental resorts, and yet has of more than 30,000 sq fr managed to retain its essen-tial Englishness.

The commuters began arriving in force 15 or 20 years ago, spured by the realization that the rail service to London was faster and more convenient than from many places in the outer suburbs, and that Brighton was a much nicer place in which to spend weekends and to bring up a family. Their presence, and that of the tourists, have spawned a number of trendy, expensive and sometimes good shops and restaurants, and have led to an improved, if still not yet abundant, choice of musical and thestical expension.

conference and exhibition like the future of centre. Its lavish new com- crumbling West Pier.

plex, built specifically for that purpose, has been energetically promoted and, if it is as successful as is hoped, the next need is likely to be for increased hotel accommodation.

There are several new indus-trial estates scattered its intangible but inescaparound the outskirts, and able vitality, were all but the town enjoys a natural guaranteed to save it from advantage as the regional shopping centre for one of genteel decline. shopping centre for one of True, there was a period the wealthiest areas in between the wars when the Britain which contains no town had ceased to be a other towns of comparable fashionable warering place, size.

size.

It has become a significant office centre, the latest development being the new European headquarters for

Fraham Greene ever enthuse culties over further factory and office development.

Again the 1960s when Brighton council, which is ackage tours to Spring house. Graham Greene ever enthuse committed to a policy of growth and diversification, has for some time been at odds with East Sussex further expansion, first in order to protect the ad-jacent countryside from creeping sprawl, and second in the hope of diverting in-vestment to less prosperous towns such as Hastings. Controls on office develop-

But it would be a mistake to assume that Brighton's problems are solely those of unbridled prosperity. There are still near-slums within little more than a pebble's throw of the sea front, and unemployment is above the national average. Claims that this is largely because of an influx of people who find the Sussex coast a pleasant place to collect the dole are not entirely convincing.

Not everyone, moreover, is entirely happy with the

council's frankly commercial approach. A vociferous conservation lobby, reinforced ment.

The annual invasion of trade unionists and politicians for their mammoth get-togethers stimulated the idea of turning the town into a year-round international states.

The annual invasion of the Marina and other seatifications for their mammoth ing the exhibition centra, slice of land in the central slice of turning the town into able, has turned its attentional slighted

DIVIDEND NOTICES

King's, Edinburgh

John Higgins

Perhaps Bizet should have called his best-known opera Don José after all. This is written out of no disrespect to Teresa Berganza, who has chosen the Edinburgh Festival for her first Carmen on stage, a proud and vibrant creation far removed from the tarty temptresses who have flounced around too many productions.

But Piero Paggioni, the director, places José at the centre of the action. He is standing there at the end of the first prelude in prison brooding on the events that have led to his arrest. Faggioni makes a visual comment on the score much in the way that Gotz Friedrich did in his Bayreuth Tamhauser. Both men use the time when the curtain is down to fill in the background to the story as they see it. But Faggioni goes further. In showing José obsessed by his memories at the beginning of each act he firmly establishes the soldier as the narrator of the piece, a deferential nod in the direction of Prosper Merimée's original conte.

At the close José is alone while the cries of joy at Escamillo's triumph are heard offquickly loses her and finally kills her. Faggioni regularly iso- rolling out cigarettes. It is an lates his two principals in a pool of ochra light, treating the chrorus and other singers as obstacles in their way. All the Conventional panoply and glato fix as many of the chorus mour, the trinkets of a tourist Spain which over-decorate so many Carmens, have been stripped eway. José has an hour, or rather a moment of triumph at the end of the Flower Song. exquisitely phrased by Placido Domingo on the opening night, but thereafter the path takes a sharp twist downbill. This point where passion suddenly flares into affection and then dies was most delicately handled by Piero Faggiori. The truthfulness of the pro-

Carlo Maria Glulini's chosen choral work for this year's Edin-

burgh Festival was the Mozart Requiem, to give the piece the name by which it will always be known, even though helf of it was the work of Franz Xaver

Sussmayr. As if to compensate for this part-diluted Mozart, Mr Giulini offered in the first part a work about which there are no doubts, the Linz symphony.

Doubts there were, however, in this performance, whose seri-

ousness seemed to give a fore-taste of the Requiem. For Mr

Giulini, it was clear, the im-portance of its symphony lay

in its Adagio introduction and

its slow movement, both of which were done with a sobriety

which were done with a sortiety which did not mask involutions of feeling. In other parts of the work there was a want of gaiety, in part due to some drag in the string playing, but also. I think, intended by Giulini to draw attention to

more weighty matters. The Scherze, for instance, sacrificed some of its vitality so that the Trio might register as a moment

of mature consideration, with

Ezio Frigerio's sets. Rumour
has it that these had to be redecimal to fir the King's designed to fit the King's meagre resources. If so, second thoughts were best. Frigerio Cameu's driving force is her shows a dusty corner of Seville where the masoury is crumbling off the archway in a city wall but the unimate goal is free-day. with the corpse of Carmen thoughts were best. Frigerio stage; the crowd remains off the archway in a city wall unseen. All is concentrared on and beggars huddle like bags of the amour fou of a corporal for rubbish at its base. The overall a gypsy girl : he appears to win colour is grey, as though her confidence in the tavern, Carmen were working in a cement factory instead of

> as possible on to a pint-sized stage, remains throughout the opera. Ir adapts poorly to Lillas Pastins's tavern, a frugal place even in this dingy quarter, but Frigerio has the idea of throw-ing a series of off-white sheets over the floor for the third act

unlikely spot for a romance

but it will do very well for a

The vocal strength faded for a moment at the end of Act II. Elsewhere Miss Berganza was a model of controlled refine-ment, haughtly independent and instantly alluring. How this Carmen would go in a larger theatre remains to be heard; for Edinburgh it is tallor-made.

Placido Domingo's José, an unsophisticated soldier stationed in an unfamiliar town, has all the assurance it lacked in Covent Garden's duil staging. Rarely is he heard in so small a house, and with no refters to ringer to best the idea of throwing a series of off-white sheets over the floor for the third act in the mountains and has snow falling on the smugglers. Life is hard: dust in the city and stero temperatures in the hills.

Teresa Berganza is the dash of colour in this sombre and unromannic Spein. Wisely she has taken a small thearre for her first Carmen. The voice, with that familiar dusky ismbre,

Before these two interpreta-tions the other singers lose lustre. Mirella Freni has been the most affecting Micaëla, but as she is moving to heavier Verdi roles the girlishness for this part is slipping away. For so scrupulous a singer she made so scrupulous a singer she made little attempt to scale down her performance for the house, and it simply did not fit. Tom Krause remains a routine Escamillo; he has the height, some of the swagger and little of the brilliance for this beast of a part. Jean Laine's Zimiga caught the ear among the rest of the cast, not least for his handling of the words.

This problem Polyder will have to face when they record Carmen next month with a different Escamillo and Micsella. The conductor, Claudio Abbado, has restored much of the spoken dialogue, despite the fact that his artists handle it poorly, and has used the Oeser score with a faw snips. This is Carmen, Abbado style, highly effective in the theatre but perhaps questionable on disc. tionable on disc.

While he makes up his mind on this matter he need have no worries about the playing of the LSO, flery and tender by turn, steeped in the drama both interior and exterior of Bizet's music. Abbado was not always ar one with his chorus, but the LSO were up to Edinburgh's highest musical level.

Killing Time Soho Poly Ned Charlet

I sometimes complain that the rain of many playwrights is their desire and financial need to write too much, dissipating what they may have to say over too many plays. It is a complaint I may have to partially reconsider. Barrie Keeffe is prolific, with plays ranging from the sublime to the searing and a few missires. But his rapid composition sometimes has the unusual effect of enhancing the authenticity of what he writes, making it itimely in the way that only pop songs are occasionally timely.

Killing Time is his second their desire and financial need

Killing Time is his secon play to open in two weeks.
Written, like Up the Truncheon, for the National Youth
Theatre, it is considerably
smaller in scale. It employs only five young actors and is staged as a lunchtime show in the tiny Soho Poly.

On the wall round the stage are posters of the present, advertising the film Car Wash and pop concerts, exhorting citizens to guard their valuables, and lock up their cars. Graffiti are scrawled across the posters and walls. The name of the football team Millwall sets the location in London and the voices and speech of the fince unemployed school leavers that keeffe is writing about evoke a part of London that has hardly been written about since Edward Bond's Saved.

Without fobs, and subaisting On the wall round the stage

Without jobs, and subsisting on the minimum dole handouts, the boys are aurning casually to crime. Because there is a demand for a left-hand drive Rover 3500, they tread their familier territory of Lewisham hoping to earn a bounty by helping to steal such a car They joke and complain about their poverty. One of the boys is considering working in a factory in a job which the others consider women's work. Another boy has finished a year's "training to be an expert" in refrigeration, only to find no job available though he swears he can refrigerate anything, given the tools.

Keeffe uses raw, realistic language, opening with a crude, dispensable, spoken graffito, which is none the less accurate and sets the tone for the rising cynicism as the boys stand outside a Jubilee Dinner drinking stolen whisky and wine, hearing a Cabinet Minister lamenting unemployment. The play has the vital frenzy and immediacy of punk rock, echoing an angry song by The Clash, "Career Opportunities", which is played before the show, but leavened throughout with comedy.

Bill Buffery's direction cap-tures many of Keeffe's impres-sive images, as of the boys wading in a pond, searching for keys they have thrown there in anger. The young actors show an understanding of the siving away their secrets. The songs range from ballads and untypically East End blues to stoccato rock, and several of the actors are musicians who minutes before somebody their tachnical skills, but the songs do work in the songs do work material not always matched by their technical skills, but clowns amiably in good contrast to the fury of Michael Kelly's performance as the most criminally inclined of the three.

> Summer Music Oueen Elizabeth Hall

Joan Chissell

Though inhabitants of the North and South poles must by now be weary of reading about South Bank Summer Music Beethoven-oriented programme from the same few hand-picke artists, the number of people who come to the concerts each night proves that there can never be too much of a goothing. Public response he wholly vindicated the decision of the control to extend this little festive from two weeks, as hitherto.

Monday brought more Ber hoven sonates and tries. I violin, cello and piano, fre Salvatore Accardo, Lyun Harr and Christoph Eschenbach. Strangers until a week or ago, and perhaps at first t politely self-effacing, the seemed on this occasion have established so sure understanding as to be able assert themselves more bold. as individuals. ## A variety show of crime

England, England Jeannetta Cochrane

Ned Chaillet

Many people already seem to know that the new musical by Snoo Wilson and Kevin Coyne is inspired by the rise and fall of the Kray brothers, although they are called Jim and Jake for the sake of the play. At a

public house near the Jeannetta Cochrane a man at the ber told me he knew the Kray brothers who, he said, were gentlemen. He had not seen the play but, he told me, if it failed to give ms a picture of the twins, he could. For a variety of reasons it did fail to give me a picture of Jim and Jake. When Mr Wil-

son's narrative, scudding in its oblique way, seemed about to provide insights, Mr Coyne's music popped in with all the intrusiveness of the songs in a dated Broadway romance to stop the action. The action ranges from

infancy to incarceration, from Jake's childish attempts to strangle his brother to the suicide of Jim's wife whom Jake paranoically suspects of

step from the band to play an Hain) sings that he is really a seri of a giant falcon, the letter a symbol that haunts Jake extraneous to the play. Even throughout his life.

As directed by Dusty Hughes, the play is a variety show of crime, more allied to the music hall than to the orderly pro-gression of biographical drama. A priest appears as the ring-master who opens the cere-monies, promising us a moral tale while a lighted sign at the back of the stage proclaims: "A Life Divine". The rwins nominate an actress to portray their mother, then do comic turns or dramatic monologues

woman, they are nearly always extransous to the play. Even-more often it is the lyrics which bring the play to a standsrill. Nothing is revealed by a song which remarks a second control of the play to be a song which remarks are and a second control of the play to be a song the second control of the play to be a second control of which repeats over and over: "They love their mother, yes they do". The spray of images could work to reveal something about the twins, especially given the extraordinary performance by Bob Hoskins as Jake, belling

turns or dramatic monologues as their story progresses, alternating them with songs belted into hand-held microphones.

Events pass rapidly, characters are sketched quickly and vividly, but as the action moves from the East End to the West End. as the twins basis to racy, the non-dramatic nature of the songs begins to take its music, fragmenting the story it toll. Mr Wilson's quirky has to tell. Scattered genius is humour and sharp theatrical images are rarely allowed to develop for more than two might do better in the bar.

Bob Moskins as Jake, beling out the songs with amazing style and finding nice brotherly interactions with Brisn Hall, as Jim. But what happens is something different. The sudden bursts of theatricality, images like that of a box which serves as victim to shootings and knifings by the twins and the sudden appearance of a the sudden appearance of a giant falcon feeding its young on an airliner, heighten the music hall aspect and further

# The Renault 30. A car to re-awaken the driver that learks inside all of us.

Remember your very first sports car?

Fast. Responsive. And loads of fun to drive.

But hopelessly impractical once you've progressed into bigger saloons.

Which are certainly much more comfortable, but often very boring to drive.

With one notable exception.

The Renault 50 is among the most luxurious prestigious saloons on the road.

But with a 2.7 litre V6 engine it easily puts most sports cars to shame.

Acceleration is remarkable adults is help at 0-60 in 9.7 seconds, and a front seats at top speed of over 112 mph makes in the back.

cruising effortless at 70 mph.

However, it's the handling as well as the performance which makes the Renault 30 such a joy to drive.

Front wheel drive and the positive but light power steering put you firmly in control behind the wheel.

And fully independent suspension gives an uncannily smooth ride, even on bumpy roads that you'd never dare to negotiate in the average two seater:

Comfort, of course, is the Renault 30's strong point.

Sumptuous seating for five adults is helped by fully reclining front seats and 56% of elbow room in the back.

\*What Car 1977

Which still leaves space for a cavernous boot under the tailgate.

(You can even fold away the back seats, giving you thirty

four cubic feet. More than any car in its class.)

Standard fittings include a centralised door locking system, electric front windows and cigar lighters back and front.

But for all its passenger comforts, the Renault 30 is still very much a car for the driver.

And if you still yearn for those days when you raced along with the wind in your hair and the sun on your face, we do offer one consolation.

An electric sunroof as an optional extra.

RENAULT 30TS

An alarming postscript to The Times investigation into police bribery

## Corruption at Scotland Yard: the biggest scandal of all has yet to be uncovered

"London policemen in bribe allegations. Tapes reveal planted evidence." On Novem-ber 29, 1969, The Times pubber 29, 1969, The Times published what seemed in those days to be an incredible story of corruption among Metropolitan Police detectives. The officers involved were not high-ranking. The money they had taken amounted to less than £500. Yet this was the most porious substantiated allegation serious substantiated allegation of corruption made against Metropolitan officers for 40

The basis of the evidence gathered by The Times reporters were conversations they had recorded between a petty south London criminal Michael Perry, and three detectives who were taking money from him. Two were regional crime squad officers based at Scotland Yard. The third was a local sergean, John Symonds, who worked from Camberwell. It was the Symonds conversations which cern, for he was talking freely of a "firm in a firm": a network of corrupt detectives throughout the Metropolitan Police district always ready to protect criminals in return for money Symonds described this system with such assurance and in such detail that The Times was moved to state in its first leader that day, "it is important in justice to the Metropolitan Police, and in particular to the plain clothes branch, that the most stringent inquiry should now be made."

An inquiry was indeed set up. It took two forms. There was an internal investigation, initiated by Scotland Yard, immediately the allegations were published. But 10 days later, in view of the "wide public interess" aroused by The Times report, Mr Callaghan, then Home Secretary, announced that "someone independents" should also be associated. dent " should also be associated with the investigation—Frank Williamson, former Chief Con-stable of Cumbria and at that time HM Inspector for Constabulary (Crime). Williamson was known to be

ruthless investigator of corruption and certainly would have carried out the most stringent inquiry if he had been put in sole charge. However, he was appointed merely to "advise" on The Times inquiry. Neither the Mer's unique status in law nor the entitudes of the Yard chiefs of the day would allow him to direct or control it. Williamson made sure he brought in his own team of provincial officers to strengthen his efforts, but whenever he attempted to force home essen-

about his appointment in the offence. But Brooks had escaped first place was being flouted from the local station by throwfirst place was being flouted with impunity. The public's concern was only that there

trial at the Central Criminal Crurt earlier this year as, arguably, the most corrupt officer ever brought to justice in the entire history of the Metropolitan Police. At the very time when Moody was put in the entire of The Times inquire. charge of The Times inquiry— May 1970—he was taking huge sums of money from Soho pornographers in his capacity as head of the Yard's obscene as nead of the rate students
publications squad. While he
was investigating the petry
graft of wayward but lowly
officers Moody was himself

officers Moody was himself operating the most systematic, organized corruption ever uncovered in a Bridish police force. So how and why Moody took control of The Times inquiry is itself a matter of intense public interest.

Another chief superintendent had originally been put in charge, Fred Lambert. He was given the task just because he was "top of the frame"—the DCS in C1 Department who happened to be on call for whatever major investigation came happened to be on call for whatever major investigation came
up on the day The Times chose
to publish its story. This was
in itself unfortunate, for Lambert knew several of the implicated officers very well indeed.
He informed his superiors but
they seemed unconcerned about
this debilitating personal link.
Lambert also reported this to
Williamson as soon as the out-Williamson as soon as the out-sider arrived. Williamson was shocked, but he knew there was nothing to be done about it. Besides, Lambert appeared able and willing to do the job

thoroughly.

Already, however, the shady figure of Bill Moody was on the inquiry ream, though not then as its head. Moody had taken over what became known as the "Nuneaton end": the strange circumstances in which Michael Perry, the central figure in the original Times report, had been taken to Nuneston in September, 1969, for questioning about a local robbery, only to make allegations there against Det Sat John ymonds. That was two months before the publication of The Times's own investigation in November, 1969, which appeared to confirm retrospectively Perry's allegations at Nuneaton. The Warwickshire force investigating the robbery decided to forward this infor-mation to The Times inquiry

In December, 1969, neither Williamson nor Lambert had any idea of the significance of the "Nuneaton end" so far as Moody was concerned. But in fact Moody had a very personal reason for wishing to bottle it up. Persy had not been the only man who should have been tial lines of investigation he taken to Nuneaton for question-was immobilized. was immobilized. ing. Another man, Roy Brooks,
In this sense the "wide public interest" which had brought on suspicion for the same ing hot soup over the constable who had brought it to his cell. concern was only that there should be no cover-up at Scot-land Yard. Yet the man the Yard chose to play the dominant role on most of the inquiry was himself monstrously corrupt Det Chief Supt Bill Moody was revealed in his own a statement, accounting for his convicted for a petry porno-movements, made by a Mr graphy offence. Holbert who was a local justice The unsatisfactory circum-

of the peace. Brooks would be stances in which Lamno longer needed, therefore, for

But this Mr Holbert was no JP. He was a south-east Lonioner who earned his living by running " between Sono porno graphers (and other criminals) and the policemen who were in their pay. He was Frankie Hol-bert, Little Frankie or Frankie the Earber, and one of his duties was carrying huge sums of money from notorious Soho figures such as Bernie Silver and James Humphreys to none other than DCS Bill Moody, head of the porn squad. So when The Times inquiry threatened to engulf even the Holbert statement Moody had to move in. For if Holbert had been investigated by Fred Lambert or by men from Williamson's provincial team he might well have revealed the entire porn squad saga as early as Christmas 1969. Moody's swift footwork, however, put that development back by more than four years. At the time Moody

vented it for ever. Moody appears to have told Holbert to leave London for several weeks until things quieted down. Holbert took a seaside break at Winchelsea, Sussex, staying in a caravan which, ironically, he had bought four years earlier from Bill Moody. By this manoeuvre the detective saved his own skin, but poor Frankie Holbert was not so lucky. In 1973 he was to commit suicide mystertously only hours after being convicted for a petty porno-

must have thought he had pre-

bert was dismissed from The Times inquiry in May 1970 are too complex to explain in this short article. But it is clear that, whatever faults Lambert may have had, his integrity is not in doubt. The official reason was lambert's disturbed domes-tic situation, but in Moody's recent trial it emerged that the real reason may well have been Lambert's commitment to the Frank Williamson way of conducting The Times inquiry. When Commander Wally Virgo, Lambert's immediate superior, told him he was being taken off the inquiry Lambert says Virgo
explained, "You have backed
the wrong horse. You have
backed Frank Williamson

but he retained charge of the obscene publications squad until August, 1970. A few months later Williamson moved on to other duties while his provincial aides returned to their respective forces. Williamson resigned from the inspectorste at the end of 1971, dismayed by the lack of con-cern with which the Home Office appeared to be treating his repeated assertions that corruption among Metropolitan detectives was not occasional but endemic. Bill Moody, meanwhile, staved on The inquiry until the spring of 1972 when at last Robson and Harris, the two regional crime squad officers named by The Times, were convicted of corruption

onds, fled the country only a few weeks before he was him-self due to appear at the Central Criminal Court. He had made no Criminal Court. He had made no secret of his pending departure. He had sold his bonse, bought a moone caravan on HP and his girl friend had also sold her business. Strangely, no one bothered to stop Symonds. He had not even been asked to surrender his passport. Perhaps that was because he had been threatening to spill the entire story of the firm in a firm in open course, the officer in charge of this prosecution too.

So it took nearly two and a half years to secure the con-viction of just two detectives. At one time there were about 30 Metropolitan officers on the At one time there were about 30 Metropolitan officers on the inquiry team, yet they had come up with little substantial evidence to add to what two Times reporters and a sound engineer with a few tape recorders had gathered in just four weeks in 1969. However, there is good reason to believe that, had Williamson's five-man provincial team alone carried out the inquiry, up to a dozen Metropolitan detectives would have been brought to trial. The way Scotland Yard handled the affair, both before and after Moody took tharge, ensured that only the minimum would be achieved Indeed, if it had not been for the vushakable integrity of The Times reporters, Garry Lloyd and Julian Mounter, their tapes might also have been discredited as forgeries. In those circumstances even Robson and Harris would have been acquirted, Their ultimate conviction owed nothing to the Yard investigation. They were convicted in spite of it.

convicted in spite of it. How then had Moody of all people been selected to preside over this undistinguished effort? It could have been merely because the blind tradition of established Yard procedure limited the beautiful tradition of the stablished and procedure limited the stablished tradition of the st ted the choice to some 15 chief superintendents in C1 Department (the central office of the CID which was headed, from March, 1970, onwards, by Commander Wally Virgo). But of course any semor officer could have been chosen from any Yard department, not just the CID. It is still possible, though rather naive, to believe that Moody fell upon the job by chance. A more alarming thought, which one would prefer to jenore is that he might fer to ignore, is that he might have been put there by others in the Yard hierarchy who perhaps knew he was corrupt—a man who would ensure the job was done not just badly but conscientiously so. Certainly Moody could never have properly investigated the truth of Symonds's " firm in a firm " remarks. Had he done so he would have had to arrest himhaps knew he was corrupt

There are many readers who may be thinking "why bother to rake all this up again?" True it all happened years ago, Moody is serving 12 years in prison, and so is his immediate superior for part of the time in question, Communder Virgo: Also the official wisdom now seems to be that Sir Robert

Mark's reforms have effectively abolished corruption. But in fact corruption remains a serious problem in the Metro-polism Police. In recent months new scandals have been uncovered which should destroy eny complacency. There is also the external legacy of the Mark purge. Some of the police officers who resigned under a cloud when Mark was commissioner, but who never faced prosecution, have gone on manded top security jobs outside the force. Mark's proud boast of more than 400 men who chose resignation rather than disciplinary humiliation may have eased his own problems, but the rest of us outside the force—personnel chiefs selecting key manpower, for instance—cannot

manpower, for instance—cannot always tell the difference between those who have retired honourably and the many others who have quit in ignominy. Corrupt men in security jobs can do as much damage to society as they used to cause in the Metropolitan Police. This problem Mark was not obliged to consider. The biggest scandal of all

still needs to be investigated. How was it that the scale of corruption revealed in the three recent Central Criminal Court recent Central Countries went un-noticed for so many years by those Yard men who ranked higher than Bill Moody, Welly Virgo and Commander Ken Drury (the fallen head of the Flying Squad)? Was it be-cause of blind trust or loyalty; or stupidity, or complacemcy. Were these men, later convic-ted, really so brilliant at conwas going on around them.

It is disappointing that no public figure—no Home Office minister or senior official, no police chief, indeed no new-paper editor either—has sought to establish a public inquiry into what all these convictions amount to, into the mystery of how this cancer of corruption penetrated London's detective mentality so deeply. In 1964 the Home Secretary of the day set up an inquiry "into the circum-stances in which it was possible for Det Sgr Herold Gordon Challenor to continue on duty have been affected by the onset of mental filmess". Thirteen years ago this mere detective ergeans with some unfortunate brick-plenting propensities merited a two-month public inquiry, well over one hundred witnesses and a 170-lpage published report. It is surely far more important today to estab-lish an inquiry "into the cir-cumstances in which it was pos-sible for DCS Alfred William Moody to be placed in charge of The Times incurry when it was common knowledge among his junior colleagues, Sobo pormgraphers and south Lon-don criminals that he was deeply, indeed rapaciously, cor-

#### How young Liam learnt that **Protestants** can be friends

Violence in the streets: a world away from Corrymeela

Last week, just a few months before his fourteenth hirth-day, Liam Doherty met a Pro-testant for the first time in his life. The result was not at all what either had been conditioned to expect. Within a day the two had become firm friends determined sometow to commune their companion-ship ecross the bitter sectorian divisions which scar ordinary life in Belfast and stand stub-bornly in the way of any workable solution to the violence.

As a Roman Cambolic and resident of Turf Lodge, un-questionably the most hard-line republican estate in the city, Liam had previously held rigid views about members of

the opposite religion.

"I thought all Prods were big and tough and only out to get us "Catholics" he explained. "Until I met John, I always said that if I ever came across a Protestant I would can his throat, but now I can see they are not really any different from us."

Describing his new friend.

ferent from us."

Describing his new friendship with boyish enthusiasm,
and not a little amazement,
Liam went on: "To start with
we talked a hit about religion.

He knew abour God, but he
did not know who Our Lady
was. He boasted that the
Catholics in Belfast were our
numbered by the Processants numbered by the Protestants, but I told him that if the real fighting begon the Army in the south would come in on our side. But after a bit we did not bother with thongs like that, we were too busy having a good time."

Any friendship between teenegers of opposing religious would be unusual in Belfast, but this was even more so beca of John's own family back-ground. He lives in Glencairn, a bleak Protestant housing estate which has seen more than its share of violence Glencairn is one of the most for extreme lovelist paramilitary groups and an area where. a number of Catholics bave been found murdered, some with their throats slashed from ear to ear in a brutally ritualis-tic fashion.

Not surprisingly, initial contact between the new teenage friends did not take place on their home territories, areas which fear has ensured are as rigorously segregated as almost any part of the world.

It was one of a mamber of similarly bearcening relationships formed when a group of families from the two, estates spent last week on horiday at Corrymeels. Described by one community worker, as "the twentieth-century equivalent of a hospice", it is a unique ecumenical recoordination centre perched on the rugged Antrim cliffs in surroundings which provide a complete contrast with the sortid back streets of Belfast 50 miles away.

For eight weeks every sum-mer the centre arranges bolidays for families deliberately selected from enclares in the city which although adjacent. are as remote to members of the opposite religion as any fortion for individuals, the carefully planned holidays are also designed to have a long term effect in bringing together men, women and chaleren which

Relying on voluntary funds and often working at consider-able personal risk the organizers have established a network of small groups in every part of Belfast main purpose is to bolster the contacts made against hostile

ressure from extremists. Mr Peter McClachian, a. mer Unionist politician who had charge of last week's party, remains convinced that the 11year-old venture is influencing entrenched attitudes, although progress is necessarily slow and vulnerable to sudden increases in tension caused by the violence of everyday life.

"The main problem is not mixing the religious, but helping people to stake off the ghetto tensions which colour every aspect of their lives," he explained. "A few days here would convince anyone of what many of us already know, that without peramilitary pressure 90 per cant of the people in this province would be able to get

The discressing level of ten-sion under which most Belfast citizens live is often forgotten in the delty coverage of inci-dense which has bred indif-ference, if not contempt because of its familiarity. Not one of the families briefly enjoying the blustery Antrim sunshine last week had escaped its experiences which most outsiders would flud unbearable.

One women in a mixed marriege had not seen her favourite brother for seven years eithough he lived less than mile assey, and a family of five children were feading for them selves with a father in prison for terrorism and a mother in -

## Putting poets on the shelf for posterity

Towards the end of 1877 recorded Mary Had a Lamb. Since then, Little Lamb. Since then, Arnold, Browning, Tennyson and Hardy have died; and it is unlikely that, between them, even an hour or so of their recordings remain.

I hold it as self-evident that

this is a subject for regret, but and future poets are concerned, would be neither difficult nor taxatious to mend.

long holding 380 reels of 10/in polystyrene recording tape.
Had we, as a customary aspect of their publication, been able to record the roughly one and a half million lines of still-

wanted verse composed in English between 1300 and 1900 AB, that many tapes would retain them all with room to spare. Today, the wholesale price of such tape is £5 a reel; three superior recording decks would cost £8,000; the construction of studio facilities about £3,000 more; which leaves the premises, the invention of a cata-logue-cum-rerieval system, the wages of the staff, an advance against royalties to each of the poets, and the annual running costs: perhaps £50,000 all told -rather less than the price of the lavatory doors on Concorde. The library need not be physically independent. An adequate foundation grant

might persuade the Institute of Recorded Sound to house and housekeep its stock together with the 200,000 discs, 10,000 taped hours of contemporary music, and the collected songs of British birds and locomotives

already in its care.
And because, if comprehensive, the library's ability to earn a part of its own keep is sure, advice on questions of copyright in performance and in reproduction should be sought at the outset.

I hope that by now any reader who recalls hearing or hearing of a cylinder cut by Hopkins or a disc by Kipling, say, is struggling to locate the echo.

Discoveries may follow the first librarian's appeal for his-

and sent to prison. However, during the final stages of their trial, the third man, John Sym-

The basis of the librray will be its gradual acquisition of recordings by poets of their verse at the time of its publication. Should the practice become habitual, by 2077 we will have an interesting collection.

Printed texts will fat least for the present) continue to be the usual way of publishing verse. Near optimal system though it may be, print can represent verse only in part. To exclude certain factors involved in its composition because they cannot appear on a page is un-

projected rhythmical variety onto a common metrical ground; what use he made of a famous type of line in relation to its use by his predecessors; what pace and pitch he chose; how, for instance, Milton scanned "Rocks, caves, lakes, fens, bogs, dens, and shades of death as opposed to "Immutable, immortal, infinite", are things worth knowing.

Such questions are merely professional. Once founded the library will give much good to many people

How an author rhymed; what Paradise Lost entered the punctuation and linagedx fiz, world not on the tip of Milton's temporal values he gave to punctuation and linage; how he Shellar than say and im. Shelley, they say, read in a harsh, unattractive voice. Tenny-played Celtic bard. Cummings, Lawarence, nd Stevie Smith, on the other hand, are better heard than read. Kurt Schwit terms world-language poem Sneezing can only be heard.

And there is always the text. ho will the librarian select for his first accession? That is a risk such experts have to take. I would advise him to begin with the oldest.

## THE TIMES DIARY/ PHS

#### The rich aromatic bitters weet chunks of Frank Cooper's Oxford Marmalade have made the British breakfast a matter of envy the world over. Ever since Mvs Cooper filled the first jars in 1874, the men of Oxford have spread its fame in the tropics. the New World as far as the Antarctic and Everest itself.

#### FRANK COOPER makes the marmalade that makes the British breakfast

#### Vole begins its quest for country persons

That heroic campaigner for real ale, the writer Richard Boston, is to launch a magazine caffed The Vole. The title is derived from Boot's famous words in Scoop, where Evelyn Waugh has his anti-hero say: "feather-footed through the plasty fen passes the questing vole".

Not surprisingly, the new magazine will concentrate on country matters—bir Boston insists that the title is ironic and that he will not seek to coulate Boot's prose. His argument for the venture is that all Britons are country persons ar heart. Which may, or may not, explain the initial print order of a mere 20,000 copies.

The Vole's main concern will be with conservation and the environment. Mr Boston con-cedes that these are areas already covered by other publi-cations, but he believes that the wide interest in them is a symp rom of a new approach to lifean approach that he intends to reflect in his journal, the first issue of which is scheduled for September.

The vicar of a London W13 replacement curate, promises in his parisk magazine to leave " no stone unturned in his search".

#### The long and short of success I spent yesterday morning of South Shields. This is a watching Movie Maker's 10 best jokey and highly imaginative

amateur films of 1977. Two of them are good enough to be niques of Constable, Turner, shown in cinemas — though, Monet and Van Gogh. Like all bearing in mind some of the the best jokes, it has its basis commercial films I have in an intelligent idea and does suffered lately, may be this is not insult its audience.

a poor compliment. The magazine's £500 first prize has gone to The Worp Reaction, made byu Tony Traf-ford, of Reath, Derbyshire. It is a perfectly realized film, raning for 27 minutes, and it tells how a mentally sub-normal youth assembles a load of scrap and, inexpicably, levitates it. It is original, whimsical and

touching and the cinema chiefs must make la point of seing it. The other "professions" amateur film I liked was a three and a half minute carroon. Four Viewsl by Sheila Graber-

#### WHICH BOMB IN SOUTH AFRICA?

South Africa was many years ago identified as an industrial country which would be capable of making nuclear weapons by the late seventies. But there seems no reason to reject the denials of the South African Government that they intend to test one. France has twice sent representations about it, and Germany has contributed the suggestion that the Republic should sign the non-proliferation

self-denying ordinance. It is difficult to see what advantage South Africa would obtain from a test explosion, and it is not difficult to see why it would gain little from signing the treaty. Mr Vorster may possibly clarify the position today.
It is possible for South Africa

to possess all the elements of a reliable atomic bomb withour needing to test it, as indeed Israel is widely thought to have, The pertinent question to ask is what use, militarily or diplomatically, a bomb would be to South Africa, compared, for example, with Israel. No doubt a number of verkrampt members of the National Party would get an unthinking emotional lift out of a demonstration that South Africa, too, possessed and could make the "ultimate weapon". But for what targets would it be

black insurrection of some sort. a nuclear bomb is useless to contain it-nor would it over-awe the African mentality of this day and age. If the notion is that it would deter unfriendly neighbours-such as a Marxist Zimbabwe and Mozambiquefrom providing guerrilla bases, it is nonsense; nobody has used the nuclear deterrent for any such purpose. Moreover, to pose it as a threat in Africa presup-

poses a means of delivery.
On the other hand, South
Africa is extremely vulnerable to counter-threats of nuclear retaliation; all its cities are within range of Russian nuclear submarines, for example. Whichever way the sum is added up, a South African nuclear arsenal makes no sense, and its posses-sion would greatly increase convictions in the West, as well as in Africa, that pressure must be increased upon Pretoria to abandon its version of apartheid, as the basis of white supremacy, and move to power-sharing of some kind between all the races.

Mr R. F. Botha, the foreign minister, on his return from talks with Mr Vance and Dr Owen in London about Rhodesia, said that his government is increasingly convinced that "what Britain and the United designed? If South Africa's proh States wanted of us would lead lem in the next few years is a to our destruction". Evidently

apartheid as well as Rhodesia was discussed in London. Mr Botha was resisting western pres-sure for political change in South Africa, which was stepped up at the meeting in Vienna between Mr Mondale and Mr Yorster, who parted not the best of

This pressure is taking several forms, including—at last—an arms embargo. Mr Guiringaud assured Africans on his recent trip, which ended so undiplo-matically with a rowdy reception in Tanzania, that France was supplying no more arms of the type that can be used in civil warfare, and the Germans have again denied that they supply anything. South Africa is, by dint of past purchases, well armed; but these statements underline her isolation. It may be that the French and German governments have rushed them out in the fear that they wil be blamed for complicity if South Africa tests a bomb. No doubt South Africa will reserve its sovereign rights to do so, but a bomb still would be counter-productive. Mr Vorster's problem is that his new political proposals for an interracial advisory council are plainly toothless, and have rightly been rejected. There is as yet no real sign of new think-ing in Pretoria. The racial bomb meanwhile ticks away.

#### UNEMPLOYMENT AS A CONTINUING PROBLEM

This month's unemployment figures show once again the upward trend which has been clearly apparent since the spring. The rise is less steep than during the great recession of 1975 but it provides a gloomy background to the Government's efforts to persuade unions of the need to continue the policy of caution on which it is set. That background is made more difficuit by the fact that there is no real prospect that the unemployment rate among adults, which remains the best guide to trends in the unemployment rate as a whole, will start to fall or even stop rising for several months vet. Most forecasts would predict an increase of the order of 200,000 in the total before it shows any signs of levelling off. In the longer term, it will be asked whether it is realistic to think of averting unacceptable levels of inflation without pursuing policies which would cause the level of unemployment to rise even higher.

The driving motor behind the rise is the increase in the workforce. This is most obviously apparent in the large number of school-leavers who now move straight from the class-room to the dole queue with a frightening prospect of remaining unemployed for many months to come. Although school-leavers are most severely affected, however, the problem is not one particular to them. Moreover if better means were found to remove the bias which exists against schoolleavers in the labour market it would have to be done at the price of making workers who already have jobs redundant.

The real problem which the country will have to come to terms with is that we have clearly moved into a period where high unemployment is a permanent feature of our economy and society. Long periods of unemployment will be the lot of many, and as the years go by it will become obvious that this affects all age groups. that for the disease Attempts to end the problem by is no cure in sight.

reflation would be bound to fail. Even if a government were willing to sacrifice everything on the inflation front, the cushion pro-vided to our balance of payments by North Sea oil is not thick enough to allow enough expansion to make such a policy feasible. The gap between the growth rate which we could sustain and the growth rate which we would need to restore full employment is too great to be bridged.

Some things can be done to make the problem more bearable. There should be an emphasis on retraining and the learning of new skills so that job opportunities are not thrown away needlessly for shortage of skilled workers. There must also be continuing attention to the problems of the disadvantaged regions, where the situation has deteriorated considerably. These measures, however, can only make the symptoms slightly less painful. The unpalatable truth is that for the disease itself there

#### THE BALLOON OF SCOTTISH INDEPENDENCE

vith a significant following, the Scottish National Party comes earest just now to presenting n impression of buoyancy and ssurance. This impression is artly based on the relative renoteness of their prospect of ssuming major responsibility or painful economic and social ecisions, and partly belied by e signs of slackening momenim in their performance at the strict elections last spring. The erty still controls only four out

53 districts and is nowhere ar dominance in any major gional authority. But the air confidence remains and was ident yesterday when the ign which is intended to give a flying start in any early teral election campaign. The spirit of the campaign ps straight over all the awkrd tangles of the devolution ie into contemplation of the mony and prosperity of a iy independent Scotland. Of irse the party will not be we taking a hand in the parnentary haggling over the fate the Government's proposals a Scottish assembly. But it little faith that such an

If all the British political parties would regard as a worthwhile much of the attention of any end. It prefers to look towards the time when, with a majority in the assembly or among Scottish MPs at Westminster, it can negotiate for something more substantial. There is a danger in this.

Much of the party's support has always come from voters who are less interested in independence (or even perhaps in devolution) than in casting their votes in a way that will focus anxious Westminster attention on Scotland unemployment figures show a rise in Scotland to a seasonally adjusted rate of 7.9 per cent, is 5.9 per cent. Evidence like this can only strengthen the SNP's attractions as a party of protest. But the more emphasis the more it risks losing the support of the faint-hearted. Fewer than 30 per cent of Scottish voters actually favour independence. To counteract this by dwelling colourfully on the alleged economic penalties of union with England, as the new campaign tends to, only risks appealing to the streak of primitive chauvinism in some of its

staffing, of institutions, secure or not. With adequate staffing, the cost is astronomical; without it, the

cost is astronomical; without it, the results are disastrous.

Mr. Whitelaw, and other politicians, speak of the need for families to impose firmer discipline. This is true of some, but many young people get into trouble because their parents simply do not know how to cope, or have listened to too many exhortations to strictness and honce inflicted excessive punishhat can be more despicable than ublish the name of the owner he Stubbs paintings who has e a generous gesture to the in against his known wishes and Id that his wife was annoved by disclosure. No public interest possibly be served except to il the morals of journalism. hence inflicted excessive punishments or even turned their children parelease Hill,

ments or even turned their children out of the house.

Mr Whitelaw did, rightly, stress the need for individualized measures towards the end of his speech to NACRO; but in several recent speeches he has given prominence to talk of army-style "glasshouses", without, however, evidence (other than anecdotal) of their efficacy or their suitability in ordinary life. As a responsible politician he would be doing a service if he would place equally frequent stress on the complexity of the problem, and make people understand that wayward young people, even if temporarily sent away, will return to the community and remain its responsibility. Yours sincerely, Yours sincerely.

MARTIN WRIGHT, Director, Howard League for Penal Reform, 125 Kennington Park Road, SE11

Disclosing tax returns

From Dr Anthony Joseph
Sir, In general I agree with Sir
Kenneth Corley's letter (August 13)
regarding the views of irust in
marriage apparently held by Mr
Brian Sedgemore, MP. However,
in his indignation with Mr Sedgemore is not Sir Konneth somewhat more, is not Sir Kenneth somewhat

Scottish assembly subordinate to Parliament. The new proposals for legislation that the Government made last month would be less likely to keep conflict simmering than the earlier Bill would have done, but any assembly financed by block grant with no power or responsibility of raising its own revenues will always be a forcing-house for grievances.
In the same way, the Government's continued insistence that

the assembly must be elected on the first-past-the-post system would give the SNP an excellent chance of gaining a commanding majority in it with far less than half the votes. Mr William Wolfe claimed vesterday that the party would consider that it had a mandate to negotiate for independence as soon as it held 36 of the 71 Scottish parliamentary seats, regardless of the popular "That is the system under vote. which we are governed at the moment", he declared. Even a single MP wishing to secede is free to ask, no doubt. No United Kingdom Government would be obliged to accept such pretensions. But a Scottish assembly making a similar demand on no more solid a basis would carry the appearance of much greater

obscuring a valid point of the forobscuring a valid point of the for-mer: namely that husbands cur-rently enjoy a full knowledge of their wife's income (since they have to make the tax returns, save in special circumstances) but the re-verse is not true. Both husbands and wives should be treated equally in these matters. in these matters. Yours faithfully, ANTHONY JOSEPH, 25 Westbourne Road,

A changing climate From Mr David Edmundson

Sir. Your leading article about the weather (August 19) makes odd reading to a resident of what is supposed to be the wertest part of England. Although we had a wet spring we are still enjoying yet another beautiful summer, to which a repetition of last year's drought has been avoided by a few well-spaced days of rain. The last of these, over a fortnight agn, has saved the large number of us will-out mains water from anxiety about our water supplies; but our gardens need rain, frequently promised by the forecasters but never actually occurring. Sir. Your leading article about the

occurring.
Unless you publish some qualifi-cation to your article, which reads as though it applies to the whole country, some future research worker is going to find it d'fficult to reconcile your gloom with the records of sunshine in Morecambe which you print daily. Yours faithfully, DAVID EDMUNDSON, Middle Place, Heathwaite Manor,

Windermere.

A company of the last of the l

#### LETTERS TO THE EDITOR

#### Banning of street demonstrations

From Superintendent Richard Wells
Sir, Although it may seem ungrateful towards one who champions
rights of police in demonstrations,
I would take issue with Lord
Duncan-Sandys's assertion (letter,
August 17) that "all demonstration
marches, without exception, should
be banned.".

I am not stall sure that simply

I am not at all sure that simply I am not at all sure that simply because they are banned by law such marches would "happily be eliminated". Although it is likely that the irresolute fringes would be deterred, a ban might well intensify the desire of even moderate causes to take to the streets. The Police are then—rights or no rights—the body responsible for dealing with what will be, in absolute terms, illegal, with kirle choice of action.

Police training has in recent years sought to encourage the police officer to think in shades and degrees rather than in absolute terms. In the present situation that discretion is allowed to prevail. When the bricks and bottles begin when the oricks and notices begin to fly, although political philosophy-does not rate high on the police-man's list of priorities, he nonethe-less manages to retain a fairly clear and practical awareness of which demonstrator is the law-breaker in a group of protesters who are other-wise law-abiding and responsible.

In the same way, the electorate (of whom the policeman should be broadly representative) is able to watch demonstrators perform at such marches, revealing as a group a cause or an ideology, responsibility or irresponsibility alike. Having judged that performance, the electorate may then exercise its

But if all such marches are banned, the opportunity for Police and public to think in shades is starkly reduced if not eliminated.
Anybody demonstrating is now absolutely wrong. And Police are absolutely right. That is a dangerous diet on which to feed authority.
Yours faithfully, RICHARD WELLS.

Superintendent, Hampstead Police Station, 26½ Rosslyn Hill, NW3.

From Mr Lance M. Heler Sir, Freedom of speech is essential for democracy, as also in the second for democracy, as also is the right of assembly to hear and to speak. Freedom to march is not essential and is provocative, because movement begets violence, Yours faithfully, LANCE M. HELER, Stoke Wood House, Limpley Stoke, Bath, Somerset.

#### Executions in Uganda

From Lady Daubeny and others Sir, It is with the greatest distress that we read in *The Times* of August 18 that Mark Sebuliba, Dan Kintu and John Male have been executed by a military firing squad in Terrods. It is impossible to imagine this

tial to make a formal protest. Yours truly, MOLLY DAUBENY. TAN BANNEN. JANET SUZMAN, JUDI DENCH, In. McKELLEN,

#### Journalists' closed shop

26 Chester Square, SW1.

August 20.

From Mr E.Pannell 🖯 Sir, Many provincial newspapers are now is danger of disruption by journalists who are trying to enforce a closed shop at Darlington.

As Editor of the Darlington & Stockton Times. I ergaged the young woman whose decision not to join the NUJ was the immediate cause of the strike by that union. it has not been possible to pro-duce a normal newspaper since August 5, though we have been able to post news summaries in a number of communities in our

ainea. The attempt to enforce a closed shop here will be seen in better perspective if I tell you that the full editorial staff of the Darlington & Stockton Times has a simple majority of Institute of Journalists members and that of The attempt to enforce a closed Journalists members and that of those who are members of the NUJ

four are trainees.

My choice of editorial staff has been free of influence from any quarter and my staff have been oute free to ioin whichever union they wished. In producing a useful more for the startered reasons and paper for the scattered towns and villages of North Yorkshire and South Durham, we denend upon our readers for much of the news content. My own freedom of action in jupning the newspaper

All these freedoms will be destroyed by a closed show leading to a monolithic trade rolon. This, for me and for most of my sraff, is too bigh a price to pay for extra heresining nover.

Vours faithfully.

E. PANNEI L.

Fediur, Darlington & Stockton

Times. PO Box No 14, Priestgate, Darlington.

#### The Carter family tree From Mr Philip Venning

Sir, Like it or not we all owe our origins to two purents, four grand-parents, eight great grandparents, 16 great great grandparents, 32 great great great grandparents, 64 great great great great grandpurents, and so on back into the mists of time. In 1966—the year from which all n 1000—the year from which all good pedigrees date—the number of separate progenitors we can each theoretically cluim reaches an astonishing 70,000,000.000 or so.

Not only can we all be sure that some of our ancestors married their own distant relations; but anyone of largely British descent can of largely British descent can almost certain's claim some remote common forebear with the man next door, the woman in Wool-worths, or even President Carter himself. Yours faithfully, PRILIP VENNING.

#### Dealing with confrontation over pay Value of regular

From the General Secretary of the Civil and Public Services Association Sir, It is not a novel situation for strike action by a group of workers to be indicted in a Times editorial. On this occasion the action of our members has been described as members has been described as members has been described as the helpful for trade unions if The Times would spell out the circumstances in which they would consider industrial action by workers to be significant and principled. members has been described as perty and opportunist. It would be helpful for trade unions if The Times would spell out the circumstances in which they would consider industrial action by workers to be significant and principled. I am grateful that you have brought out in your editorial much of the factual background to the dispute but there are two points where I believe you misunderstand the nature of the agreement reached in 1975.

in 1975. You say that "Agreements in mid-1975 . . . were made in an unrealistic annosphere . This was not true of the Air Traffic Control not true of the Air Traffic Courtol Assistants 1975 pay agreement. The agreement was based upon a claim submitted in 1972 which was based upon changes in job responsibilities for the Assistants over a period of years. As exchairman of the CAA, Lord Boyd Carpenter said in a letter to the Government in April, 1976: "The job evaluation exercise was completed towards the end of the year and showed that there had in year and showed that there had in fact been an increase in the responsibilities of the Air Traffic Control Assistants as a whole over the

Secondly you argue there should be no question of backdaring the pay increases due under the agree-ment because this would be an invi-tation for everybody "to reach for all that they have foregone in the last two years". I do not see how this can be so. The fact that our members have not had the benefits of their 1975 encourage during the of their 1975 agreement during the past two years means they were particularly ill equipped to cope with the drop in living standards that most British people have suffered during wages restraint: Justice therefore demands that they should receive the terms of their 1975 agreement as originally negotiated. Yours sincerely, KENNETH R. THOMAS, General Secretary, Civil and Public Services. Association, 215 Balham High Road, SW17.

From Sir Jame: Blair-Cunynghame Sir, I suspect that I am not alone in expressing a growing sensation of suspicious unhappiness about the application of the Government's intentions regarding incomes which display a quality of uncertainty that is in direct contrast to the first principle of sound industrial relations to be simple and explicit.

The current dispute concerning The current dispute concerning

air traffic control assistants is a good example of this. Firstly it has been argued by the union that an agreement was reached in 1975, before the introduction of Phase 1, and that now Phase 2 has ended the terms should be implemented. Secondly Mr Len Murray, on behalf of the TUC said a few days ago, before the go-slow started, that there was in practice no reason why the Government should not be able.

greatest emotional hostility from the public is likely to be aroused. To this situation should be added

the press reports of a confidentially compiled and circulated list of small employers who have broken the rules generally outlined by the Government of the control of the eriment, accepted by the TUC and certainly also by the CBI and res-ponsible public opinion. To these supployers severe sanctions are semployers severe senctions are being apparently applied by several government departments and local authorities as purchasers without any formal, public and objective examination of the facts of each case. These circumstances have all the makings of a thoroughly confu-sing singuion with critically dansing situation with critically dan-serous undertones of bureaucratic dictation which have no place in our society—least of all in the field of responsible industrial relations.

or responsible industrial relations.

One of the best features of the work of the Pay Board, of which I was privileged to be a part-time member, and perhaps the only one which might have endured had it not been—perhaps understandably—misused by the Conservative Government at the time in an attempt to deal rapidly with the dispute between the National Coal Board and the National Union of Mineworkers, was the recommendation to set no was the recommendation to set up a Relativities Board. The incoming Labour Government, possibly equally understandably, rejected the specific conclusions regarding the miners' dispute and discarded the Pay Board machinery. This present dispute with the air traffic control accounts and others which control assistants—and others which may follow, mainly in the public sector, such as the police, the fire-men, the miners again, the railway-men and even doctors and nurses -represent precisely the range of issues with which such a procedure was designed to deal, publicly and

objectively. To establish some machinery along these lines still seems likely to be the most practical course to follow. This would not only achieve. follow. This would not only achieve commonsense solutions to these comparatively few but deep-seated difficulties arising from changing relativities in the public sector but also would reaffirm more generally the policy of incomes restraint to which must employers and employees—not to mention the Government, the CBI and the TUC—are only too ready to agree, provided only too ready to agree, provided the basis is fair and sustainable by sound arguments which can accepted by those concerned. Yours faithfully,

JAMES BLAIR-CUNYNGHAME. Chairman, National and Commercial Banking Group Ltd. 36 St Andrew Square, Edinburgh,

#### Rules of pronunciation

From Professor Alan S. C. Ross-Sir, Mrs Wright tells us that English is particularly rich in alternative pronunciations of equal authority" (The Times, August 19, 1977). I do not think that this is so; comparatively few words have two equally acceptable alternative pronunciations; at all events in my book How to pronounce it (1970), I could not point to very many. Certainly controversy is one (stress on first or second syllable). And fanatic must be another; the stress is normally on the second syllable, but the abbreviation of the word out the aboreviation of the word shows that it can also be on the first—otherwise the abbreviation would be not and not fun. Bysantine seems to hold the record for the number of acceptable alternative pronunciations.

ALAN S. C. ROSS, 37 Phoenix Way, Southwick, Sussex. August 19.

Housing Green Paper
From Mr Bernard Kilroy
Sir, in saving that the Housing
Green Paper has ducked the main
issues. in his feature of August 10,
Alex Henney is right. But he did
not crystallize its paradox. The
Green Paper says that the numerical
housing thortage is ending and that Green Paper says that the numerical housing shortage is ending and that the bousing problem now affects a diminishing minority of bouseholds or houses. Why, then one asks, are the Exchequer's subsidy bill, the price of houses and the proportion of capital funds absorbed by housing all forecast to go on increasing in real terms for the next detade? Such a courrediction makes it extremely unconvincing for the Green Paper to argue that positive changes are not, after all, needed in the existing system, as Anthony Croshand believed—especially when, as it believed especially when, as it transpires, the Green Paper shows auch little willingness to look these central issues straight in the face. On subsidies, the background studies to the DOE's Review (as disclosed by The Guardian last month) slawed that the cost of general slawed that the cost of general assistance in subsidies or mortgage tax reflet would together increase by some 50 per cent in real terms over the next decade, ie, from some £2,000 million annually to some £2,000 million. The trend is not revealed because, in spite of the plethura of tables in the Green Paper and its three technical volumes (TV), no subsidy forecast has been published.

neen published.

The Green Paper's proposals are unlikely to reduce the original projection although there would now be some shift in proportions from the public to the private sector. How can one have faith to the Green Paper's unsubstantiated belief that subsidies will only increase slowly if interest rates stabilise? For the original calculations were also presumably mude with simi-larly modest assumptions about future interest rates.

On house prices, the Green Paper Yours firself admits that they are likely A. GRI to rise moderately in real terms (TV Downsi Ch 31 as rest incomes rise slowly Strattor and, with them, housing demand——Eath.

And the second s

because of its high income elastibecause of its high income elasti-city. Any danger that there could be a surge in house prices would, it says, he prevented by arrange-ments with the building societies for regulating mortgage advances. How can the Green Paper make a crucial assumption that the market can be contained by administrative measures, so obviating the need for fiscal adjustments? It fails to recognize the existence of a purchasing power which can operate independently if incomes do rise substantially (as a result, say, of pay increases or North Sea oil).

The Green Paper shows too limit appreciation of the dynamics of the appreciation of the dynamics of the appreciation.

appreciation of the dynamics of the housing market. Its analysis is "two-dimensional"; either of price/ income/loan ratios of different categories of buyers at a single data or of averages of single groups over time; rarely both together. Two earlier DOE published studies of housing "chains" and mortgages; by showing that the gearing mechanisms change in response to economic or demographic cycles, only then reveal that such an independent purchasing power does exist; that it remains in reserve when the market is slack (as in 1970) and is exerted to the full when the market hears up (as in 1972/73); and that it can operate to a large

the marker hears up (as in 1972/73); and that it can operate to a large extent independently of the regulatory measures on which the Green Paper plus so much faith.

On sources of funds, the Green Paper is more candid, it admits (TV Ch 7) that, over the next decade and on existing greeds (ie, without taking into account any change in demand as a result of its proposals or of spontaneous pressures), the or of spontaneous pressures), the volume of funds needed to finance house purchase transactions would have to increase from some £4,000 million net per year to some £6,000 million net in real terms. The Green Paper expresses some anxiety about whether these funds will be forth-coming without special arrangements—as well it might given the rapid rate at which the demand for house purchase funds has risen over the less death to does yet home. house purchase junus has risen with the last decade. It does not how-ever, raise the question whether ever, raise the question whether ever, raise the question whether such a grend can eventually cause problems of competition with the demands for funds for other purposes—surely a topical issue when such a large proportion of house purchase funds are for the purpose of refinancing existing houses and so little for reel production.

Yours laichfully, BERNARD KILROY, 104 Princes House.

104 Princes House, Kensington Park Road, W11.

Bowling analysis

From Dom Gregory Murray.

Sir, it has been customary in compiling a bowler's analysis to credit him with the number or wickers, he has taken, and on the debit side to record the number of runs scored by betsmen off his bowling. Higherto up account has been taken of the na balls and wides he has of the no balls and wides he has conceded. By these extras he is responsible for adding to the opponents' total. Should they not be added to the number of runs he has conceded? Yours faithfully, A. GREGORY MURRAY, Downside Abbey, Stratton-on-the-Fossa,

From Mr J. W. Barrett . Sir, As bead of a comprehensive school with 1,600 pupils I cannot let Roald Dabl's views about home-work (August 20) pass without com-

Throughout this year of the great debate" we have had to put up with a large number of uninformed generalizations from well-known personalities who feel competent in dabile in education and whose views appear in correspondence coference between dence columns because they are well known in other fields. It simply is not true that all compre-hensive schools do not give regular hensive schools to bot give regime homework; in recent years I have taught in such schools on the South Coast, the North East and now on Hamberside, and the value and necessity of giving regular homework has been recognized by all the teachers concerned.

the teachers concerned.

Obviously there are good and bad comprehensive schools. Our school is lucky to be in an area where we ger a good cross-section of society and we have a stable and dedicated staff. These conditions are reflected in our recent "A" level results where we obtained an 83 per cent pass rate from 124 subject entries. This could not have been achieved if homework had not been set regularly and conscientiously marked by staff. There are also good and bad public and grammar schools; I have been a GCF. mar schools; I have been a GCF, examiner in mathematics for several years and I can assure you that there is a tremendous variation in lards of achievement from such

action ls. As I am writing this letter I notice that my young daughter who attends a state school is reading one of Roald Dahl's books. The television set remains family switched off by choice.
Yours faithfully, J. W. BARRETT, The Lindsey School, Cleerhorpes, South Humberside.

From Miss Sarah Tatum Sir, No homework, says Roald Dahl? (August 20). I am 13 and I go to Haverstock comprehensive school. It has a set homework timetable. We all have a little book called a "day book". In this we write down our homework for each night. (There is a minimum for each year group.)

August 20.

each year group.) It is like a diary. In the front it gives the homework set-up, school rules, holidays, etc. At the end of each week our parents sign it, then our tutor signs it. Our teachers do take the trouble to mark our home-

Roald Dahl has spoken to children from comprehensive schools who say that they get no homework. Are they pulling his leg?

My mother went to a public school; she got too much homework.
At any rate, why are adults so
anxious for children to work such long hours? Yours faithfully,

Friends House Euston Road, NW1.

#### 'Enigma Variations' From Mrs A. A. Ritrick

From Mrs A. A. Kitrick

Sir, Whith the greatest respect to

Mr Raymond Leppard and his discovery of a similarity between the
theme of Elgar's Enigma Variations
and the Benedictus of C. V. Stanford's Requiem. I should like to
point out a very much stronger
resemblance between the Stanford
theme and the Credo of Becthoven's Missa Solemnis. Indeed,
there are almost identical. they are almost identical.

Elgar must have known the Missa Solomnic, nd this would surely have been a much more likely source of inspiration for the "Enigma" theme—if, that is, any such source is deemed necessary. It does seem to me that any similarity between the Eigar and either of the other themes is quite fortuitous—for a start, one is in a minor key and the other two major, and the rhythin, especially in the second ber, is totally different. Yours faithfully, A A KEIRICK, 31 Barn Way, Wembley Park,

Middlesez. August 20.

From Mr David Mellor

Sir, I was surprised the "revelation concerning Reymord I, pard's theory of the origins of Elgar's Enigma Variations was accorded from page status, as, also, it is by no means new. On Thur-day, October 19, 1972, Mr Leopard conducted the LPO in a performsuce of the Enigma at the Royal Festival Hell: Before the perform-ance he announced his "Stanford theory" to the assembled audience. and then took the LPO through the Stanford theme. The "revelation" received a polite ripple of applause (alas no gasps) and I am sad to say, if my memory serves me right, was panned by at least one leading critic the next day with the worr's "Not good enough, Mr. Leppard". Yours faithfully.

DAVID MELLOR 16 Chartwell. 80 Parkside, SW19. August 20.

Frim Mr Miles Amherst Sic, Stanford's Requiem was performed in Cambridge in 1952 by the CUMS Choir conducted by Boris Ord. The similarity between the Benedictus and the Enigma theme was remarked on at the time. Yours faithfully, MILES AMHERST, as from The Abbey School, Tewkesbury. Tewkesbury, Gloucestershire August 20.

angua. EU. The spread of kissing From the Rev Jay Lennard

Sir, "Greet one another with the kiss of peace," (Romans 16 v 16.) How Paul would have relished writing to The Times! Yours, etc. JAY LENNARD, Birkbank Station Cottage,

and the second of the second o

#### Civil servants with their heads in the clouds

This week's guest column is by airline captain Omar Malik.

Herocs of the Air are no longer wanted. Today the regular and safe operation of seroplanes is the product of a complex and very costly process, the final stage of which is in the hands of the pilot. The flying skills required of him are probably neither greater nor less than were required of previous generations of pilots, but the earlier attributes of faith and hope have been supplanted by that of technical knowledge, and the earlier requirement for courage, particularly the blind variety, is anachronism. An airline pilot is now an airborne managing director; his duty to obviate the need for heroics, not to indulge in them.

Both the internal systems of aircraft-flight controls, instrumentation, navigation computers, et al, and the external support systems engineering, air traffic control, flight planning and so on, have so increased in complexity that they are comprehensible only to the appropriate specialist. The pilot understands little of the internal workings of the systems; he concentrates his attention upon extracting from them the outputs he requires for the progress of his flight.

Systems do not respond to individualistic approaches but to the correct set of inputs. Hence the total domination of our lives by standard operating procedures, flying manuals and checklists, (we now carry checklists of the checklists). This systemization is a mixed blessing; without it we could not cope with modern aircraft, with it the pilots' task has become more demanding. In addition to the traditional need for flying accuracy, has come a requirement to sort through a mass of data continuously presented and using it to review and update the available courses of action. This involves continually switching attention from the immediate task of maintaining the correct flight-path to the long-term task of obtaining an expeditious arrival at destination.

Any failing of the total system, whether of aircraft manufacture, of maintenance, of airfield facility or of air traffic control must be supervened by the human skill of the pilot. If he is presented with a complex of deficiencies which is beyond his capacity to absorb, then the safe progress of the aircraft is compromised. Hence pilots' increasing concern with the administration of aviation.

The manufacture of aircraft and the operation of airlines are matters of national importance.

Coutrol has therefore moved steadily into the hands of government departments—the Department of Trade, the Civil Aviation Authority and the British Airports Authority; it is therefore passing from the operators and manufacturers to the civil servants and the politicians. The issue raised is not that of nationalization, but of the increasing remoteness of those who enact the rules from those who have to apply them. Escalating costs, national interests and political overtoness constitute greater pressures upon the overtones constitute greater pressures upon the authorities than pilots can exert. It is doubtful whether administrative expediency will be the better servant of air-travellers.

The Department of Trade and the Civil

The Department of Trade and the Civil Aviation Authority have few exairline pilots on their staffs. In the absence of practical experience, so understanding of airline operation could be reached with intellect and openmindedness—but these are not the attributes most characteristic of politicians, civil servants or wartime RAF officers. Further, the sincerity of official consultation processes in aviation

Last year the CAA distinguished itself by prosecuting a pilot for an air traffic violation which he allegedly committed in the air shartly hefore he took off. He was acquirted Pilots' hoots of derision would have been louder had the farce not been at their, and the taxpayers'

A growing problem is the proliferation of warning systems. It seems that each time an administrator thinks of pilots' fallibility (often) administrator thinks of pilots' fallibility (often) or each time a pilot makes a mistake (seldom), a new warning system appears in the cockpit. The barrage of noise and coloured lights to which we are subjected in order to draw attention to a hazard and to prompt remedial action is less likely to elicit the Standard Response than an auguished shriek. The New York Fire Brigade is a worthy body but few would find its passage across their office desk an aid to calm thought. Now the CAA has added a requirement for a Ground Proximity Warning. System (five modes for five different ways System (five modes for five different ways of hitting the ground; unfortunately there are six). Installation of this system by January 1, 1977 was mandatory. Contact with reality has

led to a year's waiver.

Mandatory Occurrence Reporting (which requires a pilot to supply his superiors and the CAA a written report of his mistakes) was introduced by the CAA at the same time as the US authorities abandoned it as a demonstrated failure. If instead we had anonymous reporting and a guarantee of adequate administrative rectification the system would be both respec-

ted and productive The pattern is of enacrious which, even if well-intentioned, are ill-judged. Resources are well-intentioned, are ill-judged. Resources are devoted to trivia, apparently in preference to the serious but difficult problems. Air transport is a matter of public interest of which the authorities are the guardians. However passengers are accompanied into the air by pilots, not by the authorities. This might suggest that the public interest is even closer to our hearts than to those of the administrators.

Times Newspapers Ltd, 1977.

#### Children's books

## A wizard in his own landscape

Every two years a small accounting takes place in the back offices of children's book specialists. Figures are scrutinized, books are balanced and current reputations are rung up on various national registers. It is all to do with the biennial award of two Hans Christian Andersen Medals, given by the International Board on Books for Youth, in the course of which each country involved must nominate for routh, in the course of which earn country involved most nominate earn consideration one author and one illustrator whose total contribution to children's literature might quality as "lacting"

From the terms of the award it would seem that the salient feature here is the quality of texts an dillustrahere is the quality of texts an dillustrations in themselves, so—in theory—it
should not be too difficult for national
committees to put forward a couple of
names that will make sense to the
international jury. But, in practice, the
procedure may well start to tangle
itself up in extra-literary debates. How
far ought one to modify one's decision
in the light of knowledge—real or
assumed—about foreign response to an
author or illustrator's work? How far
may foreign judges be influenced by
the existence of translations? And can
such translations be trusted to reprethe existence of translations? And can such translations be trusted to represent the author fairly? And how on earth, anyway, will an international jury be able to compare a book of Japanese poems with a turgid tale of social deprivation in Disseldorf?

Recalling my own experience as a member of the British nominating committee in 1975 I must say that the final effect of arguing about these impon-derables is, in fact, to make you return

to first principles and choose nominees for their quality tont court. Nevertheless, although I will happily defend our decision then to put forward the names of Edward Ardizzone and William Mayne (and I would not change them now) it is easy enough to see that they must have nouplussed the international electroral conclave. Where are the great splodges of paint so necessary to a truly artistic picture book? And where are the insights into sociopolitical realities? All those quiet drawing—all that fantasy—these English are so refuned!

Well this year it is good to see that the British committee have again argued from the point of view of qualitative achievement, and of the two names that they have singled our ine illustrator, Charles Keeping, should meet with more than national acclaim. Indeed, when Mr Keeping's name was previously put forward in 1973 he received high commendation from the main jury, and there can be no doubt that his work is more comprehensible to many Continental critics than that of artists' closer to "the English tradition". His black-and-white drawing in books like The God Beneath the Sea (Keerrel) is immensely forceful, and in the work is subscided in a way that meets the European vogue for painting rather than illustration in children's books. The Weirdstone is subscitled "a the way in which each book seems to be a preparation for the one that is to the work indeed, on the fascinating aspects of Alam the work is subscided as language. The Weirdstone is substitled "a the way in which each book seems to be a preparation for the one that is to the work indeed, on the fascinating aspects of Alam the work is subscitled "a the way in which each book seems to be a preparation for the distinguishing features of it and its continuous conti Press, he even gives to colour some of the storytelling power normally given to line. It is an interesting example of

The preoccupations now discernible in these early books may crudely be described as landscape and language. The Weirdstone is sub-titled "a tale of Alderley", and one of the distinguishing features of it and its companion volume was the immediacy with which they brought an actual location to life; then, despite the inexperience of the beginner craftsman, there was also in the writing of these books an urge towards exactness of expression. towards exactness of

whether of description or of the con-versation of Alderley farmers, wizards and shape-shifters.

As Alan Garner's work has progressed.

As Alan Garner's work has progressed these characteristics can be seen more clearly as part of a profound concern for history.

It is not history in the schoolroom sense (although the Roman-British and Civil War scenes in Red Shift have more to contribute to such a thing than ever textbook did); and it is not working-class history in the tendentious modern interpretation of that term. It is history coming up through the bones of the land, or flowing through the rhythms of a sentence—casting the people of a locality, for good or ill, in the mould of their own landscape.

landscape.

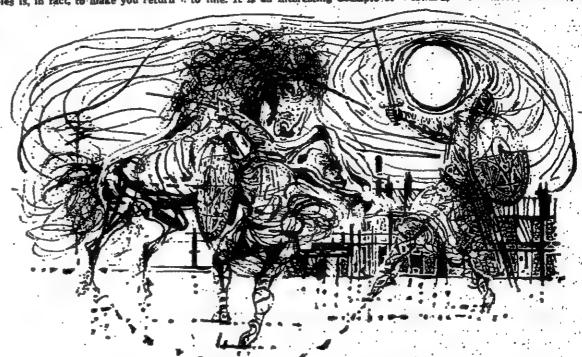

The Orol Service and Red Shift. despite moments of outstanding per-ception, were flawed in their construction—but, perhaps because of his work on two remarkable anthologies for Hamish Hamilton: The Book of Goblins and The Guizer, Alan Garner has come to a richer sense of the part played by folk-lore in the texture of narratives. Since the publication of The Guizer in 1975 his art has reached new heights in the two short tales: The Stone Book and Tom Fobble's Day. Like the best work of William Mayne

these two books seem to lie beyond any making. They were just there, in some stratum of the Cheshire countryside, and Alan Garner, by a fortunate magic, has brought them to the light of day. They combine direct accessible accounts of child experience (Mary climbing ladders up St Philip's steeple in The Stone Book) with closely realized detail of one place at one time—so that when, at the end of Tam Fobble's Day he writes of young William sledging alone down a bill: "The line did hold. Through band and eye, block force and loom to the bill and all that be owned. "Alan Garner encapsulates owned. "Alan Garner encapsulates hoth the fact of a tale and the wavrant for its telling. To the citizens of Chorley, and, indeed, of the British Is'es, would be a potenty all its own. One wonders what the prospic international jurors will make of it all.

Brian Alderson

The British HCA Committee has also named Errol Le Cain's Thorn Rose (Faber) and William Mayne's A Year and a Day (Hamish Hamilton) as works of especial merit published during the last two years, and has named Anthea Rell an outstanding translator for howork on Christine Nostlinger's The Cucumber King (Abelard Schuman).

# The bright lights taste comes to Telford.

When the Cinzano people decided to bottle their famous vermouth themselves in Britain. they went determinedly about the business of finding the best possible location for their new project. It had to fulfil several important requirements: for instance, it had to provide a pleasant home environment for the valued Cinzano work-force: it had to be in the right situation for a distribution centre; and it had to offer a welcome in the form of assistance and co-operation towards industrial investment—such as Cinzano was proposing.

After a thorough search, they chose Telfordwhere their U.K. bottling and distribution complex was officially opened on 1st July So now all Britain's Cinzano is being bottled at Telford.

Dr. Eduardo Ferrero, Managing Director of Cinzano (U.K.) says: "Our decisions on choosing a site were based on many factors, such as location, availability of labour, and price. On balance, Telford offered us the best deal we saw. Telford's assistance—not only from the straight industrial aspects—has been con-siderable, and I would most certainly recommend anyone considering a business move to look closely at what Telford has to ofter.

The trend towards Telford is summed up in Dr. Ferrero's comments. So if you're thinking of moving. expanding or just opening think Telford It offers a great deal-and a great future. Post the coupon, or contact:

#### **OBITUARY**

#### **NAUM GABO**

#### Major Constructivist sculptor

Naum Gabo, the constructivist sculptor, who has died at the age of 87, was one of the last representatives of a line of modern art whose experiments can be equated with an optimistic view. For all his iconoclasm, his position was humanistic. He believed that art must find images for the highest aspirations of its time, that it is the embodiment of a social ideal and that its existence is necessary in a healthy society. His own work, clean, balanced, perfectly made, is a ideals.

Naum Neemia Pevsner (he rook the name Gabo only after he had begun to work as a sculptor) was born in Bryansk, Russia, the son of an engineer. His elder brother Autoine had trained as a painter; Naum was sent to Munich to read medicine. He quickly transferred to the natural sciences. Munich was then a centre of experiment in art; Gabo attended Wolfflin's lectures and made his first at-tempts at sculpture. In 1914 his father sent him funds and the instructions to stay out of Russia while the war lasted. Gabo went to Scandinavia with his younger brother Alexei and they were soon joined by Antoine Pevsner. It was in Norway that Gabo was first able to realise some of the sculp-tural ideas that had been incubating. He made a number of heads out of sheet metal and celluloid and their open, stereometric form was to be the foun-dation on which his later work

Gabo and his brothers returned to Russia in April, 1917. Artists of the avent garde were feverishly involved in the new situation; styllistic experiment could now be justified in terms of its contribution to the future. Antoine Pevsner had been given a post at the Higher Arr, and Technical Workshop which replaced the old Imperial Academy in Moscow, and was now a centre of experiment and debate. Gabo was in the thick of things and in 1920, when he and his brother were exhibiting their work in the open street, he published a document which

Dick Green, who died nn

writer", since his novels and

short stories never aspired to

by Alan Siditoe, established bim as a writer of extraordinary

sensitivity and accomplishment. His first povel, In The Making,

is a remarkable reconstruction

is one of the few manifestos of modern art which still carries conviction. This was titled Realist Manifesto. There were two opposing factions among the experimental artists—one holding that art must now be transformed into useful activity, the other insisting that pure art was more necessary than ever. Cabo belonged emphatically to

Gabo went to Berlin at the time of an exhibition of Soviet art at the Galerie van Dieman in 1922. It was clear that there was little place in the new Russia for the kind of art he was thinking of and he stayed on in Berlin for ten years. Faithful to the mood of revolutionary unopianism that had been put into words in the 1920. been put into words in the 1920 manifesto, the sculpture that he now made was monumental in intention although necessarily small in scale. "Chamber architecture" Duchamp was architecture " Duchamp was later to call these works which have the appearance of models for monuments in some machine-city of the future. In 1931 he designed a project for the Palace of the soviet although Constructivism was now discredited in Russia.

He left Berlin in 1932, settling for a few years in Paris where he was a member of the group Abstraction-Creation, then moving to England in 1936. He had been here the year before in con-nexion with an exhibition of abstract art, the first of its kind, nicolette Gray. London de-lighted him and he took a studio in Lawn Road. Hampstead, in close touch with the circle surrounding Herbert Road, Henry Moore and Ben Nicholson and which was soon tinguished continental pioneers as Gropius, Mondrian and Maholy- Nagy. Garbo contributed a great deal to this period in British art, the epoch of Axis, Unit One and Circle, of which he was a joint editor. Not long after his arrival in England he married Miriam Israels, by whom he had one daughter. With the outbreak daughter. With the outbreak of war he moved to Cornwall

where he lived until 1946.

influences upon his life and writing were childhood, Cam-bridge and Ceylon. His

he left for the United States. Therel were retrospective exhibitions of his work at the exhibitions of his work at the Ttate Galery in 1966, and from November, 1976, to January this year. He made a number of visits to England during the last years of his life. He took American citizenship in 1952. Honours came to him in America: an exhibition at the Museum of Modern Art, New York, in 1948. Professor at Harvard Graduate School of Architecture 1955-54; the Melon Lectures at the National Gallery, Washington in 1959;

Gallery, Washiington in 1959; but still the occasions when he could realize his life-ling plans for scupture on the scale of architecture were extremely rare. The one work which is perhaps closest to his aspira-tions is the 50ft monument for the Bijenkorf Building, Rotter-dam, completed in 1957, a casterpiece and a monument to the ideals he had expounded so many years earlier.

Gabo's character as an arrist

was a curious blend of scientific rationalism and mysticism. He believed that the outstanding task that faced sculpture was to find a way of expressing the scientist's conception of space. In 1920 he made what is probably the earliest example of kineric sculpture (now in the Tate Gallery). A single vertical steel wire is vibrated electric-ally and the resulting wave movement produces perfect clearly visible yet insubstantial form. "We renounce . . . mass
as a sculptural ement " Gabo had declared in the Manifesto of 1920, and his experiments with new materials glass, transparent plastics, thread strung over an open form were all dedicated to the same aim. About 1936 he began to feel that the rectilinear, stereographic system that he had been using u pro then was in-adequate and he began to search for a spherical expression of space, thus treading a path parallel to mathematics. But unlike some later constructivists, he eschewed mathe-matical formulae and insisted on the intuitive, visionary ingredient in his work. He was made an Hon KBE

#### VISCOUNT GALWAY

Viscount Galway died on August 15 at the age of 82. The title passed to him on the death of his kinsmen, the ninth Viscount, in 1971. He is succeeded by his brother Mr E. S. Monckton. Lord Galway's: wife, Joan, only child of Major G. A. Williams, died in 1973.

The Dowager Countess Alexander of Tunis, GBE, widow of Field-Marshal Earl Alexander of Tunis, the great soldier, died on August 17 at the age of 72. She was the second daughter of the fifth Earl of Lucan and she was married in 1931. Her husband died in 1969. She was a Deputy Lieutenant and a Justice of the Peace for Berk-

#### SIR WILLIAM GARRETT

#### Work in labour relations

Sir William Garrent, MBE, an influencial man in his rime as an authority on industrial relations died on August 20. He was 77. He held leading positions in industrial organizations where his knowledge and influence were always greatly valued, but his real power and authority were felt in the company Monsanto Chemicals Ltd for approaching 40 years, and it was there in its various works it was there in its various works that the foundation of his success as a specialist in industrial relations were laid.

William Herbert Garrett was born in 1900, at Wrexham in North Wales, and educated at Grove Park School and Liverpool University. He served both in the Royal Flying Corps and the Royal Air Force until in 1922 he joined Montanto Chemicals. In 1935 he was appointed to the board and in that year became the compan's Director of Production, after having been for a period its works manager at Ruabon. Although he was essentially a chemist, and a brilliant one in the field of chemical industryhe was a DSc of his university. and had made some important contributions to the develop-ment of the Monsanto organization-he was in a more personal sort of way absorbed in his self-appointed task of bringing better relations into indus-try, and also in his work for the national industrial safety national industrial safety movement. He had presided over the offeirs of the British Safety Council, and was deeply interested and involved in the work of the Royal Society for the Prevention of Accidents.

From 1958 to 1960 he was president of the British Employers Confederation, was chairman of the Association of British Chemical Manufacturers, and a hon vice-president of the Association of Chemical and Allied Employers. He sai for some years on the Grand Council of the Federation of British Industries, the Industrial Disputes Tribunal, and was member of the Appointments Board of the University of Liverpool. He published The Human Side of Industry in 1950. He was made an MBE (Military) in 1944 and was

mighted in 1958. He merried, in 1925, Marion Burchall, younger daughter of Heary Heighton. They had one son and one daughter. Lady Gagreci died in 1967.

Commandant Georges Houot, a French pioneer in the use of underwater exploration vessels called bathyscaphes, died on August 7 at the age of 64. He collaborated with Pierre Willm, former chief engineer of the French Navy, in the construction of a series of bathyscaphes which they took depths off Senegal, deoths off Senegal, Portugal, Japan, and Puerto Rico, In 1962 they reached a depth of almost six miles off the Russian Kuril

Islands in the Sea of Okhotsk.

#### Medicine: Artificial pancreas

merican research team has an important advance in the pment of an "artificial as", walch can in prinbe used to make good the deficiency of dispetic is. The artificial organ conof live cells growing on copic tubes into which they hissuin. The tubes are enexcept for their ends, in except for their ends, in is or plastic cylinder that implanted in the bloud-

William L. Chick, at the d Medical School in Boston, d Medical School in Baston, sociates at other American ories have successfully the device to correct the ugar levels of diabetic hithough serious technical tiles will have to be over-zefore such devices can be red for use in human a this is the first time that approach has been used fully in living animals, arch on the possibility of any in living animals, arch on the possibility of ifitial pancreas has been led by the special difficility of transplanting a real into a diabetic patient. acreas contains several dif-kinds of cell, only one of extretes insulin. The trans-on of the whole pancreas atremely dangerous opera-1 for that reason surgeons on exploring ways of trans-only the insulin-secreting

evelopment

orporation

rer, in order to collect cells can be used to control blood insulin-secreting cells it sugar. But there are at least two increasing to use cells serious obstacles to be overcome in

from more than one donor. Rejection of pracreatic tissue is quite frequent and if cells from two or more donors are mixed it is likely to be greatly exacerbated. The main advantage of the "artificial pancreas" is that the cells are not exposed to the immune system of the recipient animal and cannot be rejected. The glass case of the device is impermeable and the tubes through which the insulin filters out are made of material that will allow the passage of the insulin molecule but not the larger antibody molecule or any of the cells involved in tissue rejection.

Dr Chick and his colleagues

molecule or any or the cers involved in tissue rejection.

Dr Chick and his colleagues inserted such devices into the bloodstream of nine diabetic rats and monitored their blood-sugar levels. Thirty minutes after the insertion of the devices, blood sugar had dropped to normal levels. When the devices were removed the levels rose again within about two hours.

To test the ability of the implanted cells to adjust to the insulin levels of the recipient animal, Dr. Chick and his colleagues also tried the effect of the devices on the blood sugar of two normal rats. Blood sugar of two normal rats. Blood sugar dropped steeply when the devices were first inserted but returned quickly to normal.

Those experiments show that in principle an "artificial pancreas" containing live insulin-secreting cells can be used to control blood sugar. But there are at least two

their development for clinical use.
One is that so far the insulinsecreting cells have been kept
alive only for a matter of months
and it is not clear whether they
could be persuaded to survive

and it is not clear whether they could be persuaded to survive indefinitely in a permanently inserted device.

The other is that in a long-term implantation the microscopic tubes would be likely to become blocked by debris and blood cells. In the American experiments the devices were not actually implanted within the body of the animal. Instead, a length of tubing was used to join two blood vessels, and the device was inserted in the tubing, which ran over the surface of the skin inside the leg.

The effectiveness of the artificial pancreas depends entirely on keeping the tubes clear so that nutrient material and hormones from the bloodstream can flow in to the insulin-secreting cells and insulin can flow out. That has so far proved a serious difficulty in research on artificial organs based on semi-permeable materials such as those used in the microscopic tubes of the artificial pancreas.

So, while in principle the American research is an important step forward, it is still some way from practical realization. By Nature-Times News Service.

Civilian airlift Civilian airlift

From Our Own Correspondent

Berlin; Aug 22.—West Berlin

now finds itself the base of something in the nature of a limited

civilian airlift westwards for persons who have fied from the east.

A total of 500 refugees were flown

out today; this exodus will be

maintained as long as the influx

from the east continues. The pub
lic cost is £4 a head as far as

Hanover. A small commercial air
ifft westwards has long been in

operation to chramwent Russian

obstruction of certain Berlin exports to the west, and this is now supplemented by aircraft carrying refugees. British European Airways alone, using three aircraft, are to make eight flights daily, mainly to Hanover, in addition to a new public tard service organized at ordinary ranes in west Garmany. The cost is being borne by the Federal Republic and West Berlin in the proportion of roughly four in one. Four-fifths of those registered as refugees in Berlin are supposed to go in west Germany, but there are also in the city 120,000 refugees who are not registered. Efforts to drain off this floating population to the west

## Leyland offers Longbridge £36m Ocean order at Scott Lithgow 32pc pay rises but insists on productivity first

But they will make counter oposals which could amount an extra £20 or 32 per cent, er the next two years.

Company crecutives will inhipsize, however, that the lk of this substantial increase il only be paid after stated iductivity increases and pay orms have been achieved and beforehand as the Longdge men are insisting. And offer will still be subject to emment approval through

t is understood that Levland offer a basic increase of and 8 per cent-within the ernment's 10 per cent guide on the present average of £62, this would mean

here would be another £6 to a week (depending on job ling) to bring Longbridge es into line with higher paid ats in the group.

bally they are offering inmany they are buttang in-fire payments in roturn for her productivity. A figure 6 has been suggested as the age easily attainable pay-

rs have already been dis-ed in detail and agreed in ciple by the union-manage-t working party which has concerned with industrial ions and pay reforms since

y Clifford Webb
Leyland Cars management ill today reject demands by 1,000 workers at their Longidge car plant for a wage crease of 47 per cent or £31 week.

But they will make counter

The Confederation of Shipbuilding and Engineering Unions has described the proposals developed within the working party as "representing the best approach to the problems of Leyland Cars".

Since the confederation or Shipbuilding and Engineering Unions has described the proposals developed within the working party as "representing the best approach to the problems of Leyland Cars".

sents all the manual unions within Leyland, it is difficult to see how the TUC can do other than recommend their approval

than recommend their approval to the Government.

The big problem now facing Mr Derek Whittaker, Leyland Cars managing director, and Mr Geoffrey Whalen, his industrial relations chief, is how to ensure that these counter-proposals receive a fair hearing on the shop floor.

Formal negoriations will have

Formal negotiations will have be conducted through the joint shop stewards' committee at Longbridge, which is headed by Mr Derek. Robinson, the by Mr Derek Robinson, the AUEW convener and a promin-ent member of the Communist

Robinson has already stated publicly that for coopera-tion with productivity improve-ments which will bring Long-bridge up to the level of the best continental companies, his members want continental wages now—not after they have kept their end of the bargain.

The probable solution—one that Mr Whittaker has adopted

the parity and incentive before—is an explanatory leaf-let posted to all employees. Meanwhile there are guarded hopes that the crippling Lucas strike will be settled today. A new company offer will be put to a mass meeting of the 12,000 toolmakers involved in the seven-week stoppage.

increase in bonus payments (double its last offer), a single payment of £100 a head for money lost in the bonus dis-pute before the strike began,

and the setting up of a working party to produce a new bonus scheme within six months.

The toolmakers have demanded £5 a week and when the 60 shop stewards considered the larger offen vesterday, they the latest offer yesterday, they refused to indicate whether they would recommend a return to

work.

Resulting shortage of electrical components has stopped production of three Leyland car ranges, and made about 3,500 car workers idle in addition to the 9,500 laid off at Lucas

Output of Jaguar cars is threatened by a wages strike and a shortage of steering parts. Some 1,200 men are on strike for another £20 a week at Jaguar's Radford, Coventry, engine plant. A further 620 have been laid off, and engine production is a strangerill. production is at a standstill.
At the Browns Lane assembly plant about 1,000 are laid off because of a strike at a steering parts manufacturer. The 3,000 labour force at Browns Lane have refused to join their Radford colleagues on strike and have voted heavily to accept the company's ily to accept the company's phase two offer of 5 per cent backdated to April when the previous agreement expired.
Today employees at both
plants will receive the full backdated increase in their pay packet whether they like the

By Peter Hill Industrial Correspondent Britain's shipbuilding industry received a £36m boost yesterday against the background of a continued world contraction in the volume of

The Liverpool-based Ocean Transport & Trading Group has ordered three fast cargo liners from the Lower Clyde group of Scott Lithgow, which now forms part of British Shipbuilders, the new state organization.
In the last 10 years Ocean has built its new ships almost ex-

clusively in overseas yards, and the placing of the British con-tract comes after considerable behind-the-scenes pressure on the British shipping industry to channel as many new orders as possible to domestic yards. These efforts have been greatly enhanced by the availa-

bility of government subsidy finance in the form of the Shipbuilding Intervention Fund.
The fund, approved officially by the European Commission at the beginning of this month, was established to enable United Kingdom yards to close the price gap between their prices and those of overseas yards through subsidies.

Decline of West German trade

the lowest received from a number of yards both in the United Kingdom and overseas. The Ocean chairman said yesterday that the company was pleased to be able to order the ships in Britain and play its part in supporting the ship-building industry.

Mr C. D. Lenox Conyngham, an Ocean director, said the Lower Clyde yard had quoted the best price possible for the three ships, taking into account delivery date, contract price, financing terms, ease of building supervision and the view taken on future currency fluctuations.

Work on the ships will start immediately, and they are due for delivery in the second half of 1979 and the first three months of 1980.

The new ships, each of 20,000 tons deadweight, will be multi-purpose cargo liners capable of carrying both containers and bulk cargoes, and will probably be operated in the group's West African trades by Elder

Welcoming the orders, Mr A Ross Belch, managing director of Scott Lithgow, said the work was vitally important for the Lower Clyde and would provide the equivalent of one year's employment at the group's

Greenock yards.

He referred to the "very difficult" time being experienced by the shipbuilding

It is probably too early, there-fore, to draw conclusions from the sharp contraction in the

visible trade surplus last month, although it could be a

first statistical indication of a

słowdown in Germany's export

value of the Deutschemark.
In the first seven mouths of

this year, however, Germany's accumulated visible trade surplus amounted to DM20,100m compared with DM18,800m in

the same period of last year.

The current account showed a

surplus of DM4,200m for the

period between January and the end of July compared with DM4,900m a year earlier.

performance, predating recent appreciation in

The parlous state of the Industry was underlined in the industry was underlined in the latest quarterly survey published by Lloyd's Register of Shipping last night. This showed that world order books had continued to decline, and had dropped to the lowest point since September, 1968.

During the last accounts.

During the last quarter—to the end of June—the world order book fell by nearly 5.6 million tons gross to a total of slightly less than 46 million tons gross.

More ominously, the survey noted that overall order intake in the first half of the year million tons-was less than per cent of the total output that period, which amounted 14.1 million tons.

Lloyd's also stated that only 18 per cent of the total tonnage on order throughout the world was for delivery after 1978. It is against this background that the principal world shipbuilding industries are now en gaged in a bitter struggle to capture new orders to preserve jobs by taking orders at con-siderable losses but cushioned by government subsidies. Ocean shares improve: For the six months to June 30 Ocean Transport & Trading yesterday

announced pre-tax profits of \$26.1m against \$15.3m last year on turnover up from \$182.6m to \$241.5m. The shares improved 4p to 153p. Financial Editor, page 21

#### No state aid to cover the blanket makers

An application by Sona Consultants, the small London company to which the financially distressed Bond Worth carpet group sold the Moderna blankets enterprise amid great controversy, has failed to obtain state assistance for reviv-

ing Moderna's factory at Mytholmroyd, West Yorkshire.
Over 300 workers at the Moderna plant lost their jobs after the Sona takeover, which involved Bond Worth in a heavy loss. Former Bond Worth executive Mr David Bowe, a director of Sona, said in January that an application for Industry Act ald would be made in order to

respen the factory.
Yesterday, a spokesman for the Department of Industry explained that an application made by Sona for Whitehall assistance had been made in March but, as additional information required by the De-partment had not been received, the application had now been regarded as withdrawn.

Letters requesting more information were sent by the Department during May and June and, in the light of a letter sent by the company dated July 11, the Department gave the company a deadline of mid-August for getting the details. Attempts were made by telephone and in person to contact the company.

The Government received on January 25, 1977, a declaration from Sona that it intended to reorganize, reequin and reostab-lish manufacturing at the famous blanket and quilt making factory.

Yesterday, the sister Department of Trade said that Sona had now filed accounts—they were lodged last week-efter reminders and an undertaking given on March 29, 1977, to world's dumping ground for tyres of dublous quality, tyre submit outstanding annual re-turns. Last month, the Department gave a warning to Sona that, unless accounts were filed by August 19, the Department's ports on Monday that unsafe tyres imported from America and sold at cheaper prices had solicitor would be asked to consider a criminal prosecution of been fitted to cars such as Jaguar, Jensen and Rolls-Royce. the company and its directors. The tyres were withdrawn from the United States market, but some had turned up in Some of the documents just received have been returned for rechnical reasons", but the

Britain and other European company is not now regarded as in default.

Moderna was sold in November, 1976, by Bond Worth, requiring a special provision against losses of £2.4m. In A spokesman for the British Rubber Manufacturers Associ-ation said: "Several reports have reached us in recent that foreign tyres of a March this year, Bond Worth requality below the accepted high standard imposed by the British spect of Moderna's bank over-draft had not yet been released, tyre manufacturers are being imported and sold on the open

as required by its sale agree-ment with Sona Consultants and Fitting these tyres was against the law and subject to heavy The extent of the guarantee penalties it was pointed out.
Mr Derek Moss, president of was not given, but guarantees given by Bond Worth to nonthe National Tyre Distributors Association, said: "The United Kingdom is fast becoming the group companies total around £2.4m. In March, a scheme of help for Bond Worth was moundumping ground of the world for rubbish tyres". ted and aid was given by the City's new Equity Bank. How-Association members would give free advice to motorists ever, Bond Worth was recently placed in the hands of a reworried about the quality and

ceiver.
The new owners of Moderna faced a sit-in by the workers earlier this year. Questions were asked in the Commons about Sona, a private company registered in May 1975 as con-

would close by March 1977.
Mr David Bowe, who was appointed managing director of Moderna by Sona, brought in

its former managing director under Bond Worth's ownership, Mr Len Robinson, and insisted that Sona had plans for refurbishing and reopening the factory.

In talks with the Government,
Sona explained its ideas for
reequipment with public funds

to make blankets and duvets for export customers and potential home market buyers It is understood that the Department of Industry remains ready to look at a new application. Part of its misgivings—apart from the failure to supply outstanding information required under the Industry Act—are due to the lapse of time since Sona's aid proposal was submitted, rendering the estimates of costs somewhat out-of-date.

determine how much cash commercial hanks must tie un in non-interest-bearing accounts at the Federal Bank. In July, Dr Otmar Emminger, the Federal Bank president, hinted that a minimum reserve reduction might be on the cards after the summer break.

Such action would help to ease the banking system through the month of September, when Post Office sells

#### Unctad call for Viewdata system early pact to West Germans on commodities From Alan McGregor The Post Office has sold to

Geneva, Aug 23 Mr Gamani Corea, secretary general of the United Nations Conference on Trade and Development, told the 113-nation trade board today that early agreement on a common fund for financing commodity stocks "is now of crucial importance to the international dialogue on development

A resumed negotiating conference on the fund is to be held here in November. Mr Corea believed a successful out-come would "immensely im-prove the climate of inter-national economic relations". Mr Susanta de Alwis, the board president, called for "a new political thrust. a new orientation and a sense of urgency" in economic negotia-

This was needed most of all, he added, in the debt situation of developing countries. While their servicing commitments were increasing more rapidly than their export earnings, there was little sign of the more vigorous efforts needed for overcoming the problem.

by relaxing the minimum re-serve requirements, which Another suggestion was that the council, which will meet under the chairmanship of Dr Emminger, might cut bank rate from the 3.5 per cent level at which it has been pegged since September, 1975.

heavy tax payments are due to

the state.

Although bankers tend to disagree about the practical vatues of a bank rate reduction, it is felt that such a move might give German business at least a psychological boost.

#### safety of their tyres, he added. Swap limits for banks likely to be increased

The Bank of England is ex- net position, and therefore did pected to inform commercial banks on Wednesday that their individual currency swap limits will be increased marginally.

An increase in the swap limits will augment the ability of commercial banks to sell or purchase sterling temporarily. Swaps involve the sale or purchase of another currency and s commitment to close out the position in the future through i forward purchase or sale of the currency.

Though the increase in swap limits would be seen as a gesture towards relaxation of exchange controls after the large capital inflows in recent months, there was speculation that the Bank might also close one loophole in its controls as a quid pro quo. The loophole allowed banks

to bypass normal swap limits by borrowing external sterling and lending it domestically, and then borrowing sterling domes-tically and lending it exter-While this did not create a

not impinge on the swap limits, it afforded banks the opportunity to speculate on the differences between domestic and sterling interest rates.

One chief London dealer said yesterday it appeared that the Bank would in future prohibit banks from borrowing sterling domestically and lending it ax-ternally for the purpose of arbitrage. The ability of banks to borrow funds externally and to lend the sterling internally would not apparently be affected, he added.

The restriction on the lending of domestic sterling in the external market would effectively provide a cushion for the pound whenever it came under pressure by making it possible to cut off a speculative attack.

In this way, the authorities would be able to maintain rela-tively low internal interest rates -to help boost investment and demand—and, at the same time, levy higher external rates for sterling. A spokesman for the Bank declined to comment last

registered in May 1975 as con-sultants and advisers to the textile industry and with only £2 issued subscriber shares. Only a few weeks after buy-ing the 100-year-old enterprise Sona pronounced Moderna as no longer profitable and said it would give her March 1977

#### Pay dispute threatens **Batchelors** with loss of beans harvest

By Ronald Kershaw Northern Industrial Correspondent

Batchelors Foods, of Shef-field, which has already lost sales worth up to £5m on its Surprise peas products because of a seven-week-old pay dispute which has prevented it from taking the pea harvest, is in danger of losing a further £500,000 on the 5,500-ton beans

About 1.200 workers a tplants at Sheffield and Worksop are involved in the dispute. The dispute arose when pay increases of between £1.24 and filtreases of between 11.24 and increases possible have been paid by the company under phase one and two of the Government's pay policy and to make the payments now

against the spirit of the TUC-Government pay guidelines. A self-financing productivity schem has been offered which should give the workers £2 a week across-the-board increase in return for a certain amount of de-manning. This would involve no loss of jobs Further, any savings made in the operation of the plan would be divided 50-50 with the

workers.

The Transport and General Workers Union, which has made the strike official, has replied with a demand that the dispute go to the Advisory Conciliation and Arbitration Service. The company's answer to this is that demands outside the TUC-Government guidelines cannot be the subject of arbitration.

#### France may present next year's budget in deficit

Paris, Aug 23.-While the French Government opposes a general reflation of the economy in the near future, it has not ruled out the possibility of presenting the 1978 budget in deficit, according to informed

The decision was taken at a restricted cabinet meeting yesterday preparing final details of the budget to be presented at, and announced soon after a full cabinet meeting on September 7.
Another restricted ministerial

meeting will be held next week to settle the receipts side of the budget. Expenditure has already been fixed at 396,000m francs (about £47,600m)—up

11.9 per cent from 1977.

Presentation of a deficit would mark a new development, because French budgets have until now been traditionally presented in balance, with supplementary deficit budgets being introduced later, if necessary.

Government repeatedly said this year that the 1978 budget would be both

freer trade

controls.

presented and executed in

The sources said possible stimulatory measures which might be taken in Germany, and to a lesser extent in Britain, would be studied in working out the budget.
the possible deficit, but recent

press reports here have speculated that it could be between 10,000m and 20,000m francs. The growth target adopted for next year seems likely to be about 4 per cent, but the exact figure will depend on any action taken by certain foreign governments, particularly West

Germany.

M Robert Boutin, the deputy finance minister, said recently that 1978 growth could be as high as 4.5 per cent after an estimated 3.5 per cent this year, while the OECD is forecasting a 3 per cent annual growth rate in the first half of 1978.

Despite pressure from employers and unions to stimulate the economy, M Raymond Barre, the Prime Minister, has repeatedly said he is opposed

#### Lay-offs at Cammell deferred after peace move by boilermakers

By Peter Hill Industrial Correspondent Boilermakers leaders yester-day intervened to end the strike by 60 stagers at the Cammell Laird shipyard on Merseyside, which has lasted five weeks and threatened the jobs of more than b,000 other workers at the

yard. The 60 members of the Boilermakers Society have been on strike and have picketed vessels under construction in protest at the company's dismissal of four workers last month for being absent from work without per-mission. The strikers-members of the staging department who erect staffolding around the ships—were dismissed by the company on Monday.

Employees were told that they faced the prospect of being laid off from last night unless

**Community** 

workless up

12 pc on year

Brussels, Aug 23.—Unemploy-ment in the nine European

Community countries rose to 5,680,000 at the end of July, an

5,680,000 at the end of July, an increase of 360,00 over the previous month, and 12 per cent more than in Jul, 1976, according to statistics issued here.

The figures mean that at the end of the month about 5.4 per cent—more than one in 20—of the Community's workers were on the dole. This compares with June's 5.1 per cent and 4.8 per cent in July last year.

According to the report, this sudden rise was due mostly to the annual influx of school-leavers looking for their first jobs.

All EEC countries showed an

June. Belgium topped the list, with a 19.2 per cent increase, followed closely by Luxembourg, 18.5 pe rcent up, and Britain with an increase of 11.3

Ireland remained top of the EEC unemployment league with 9.5 per cent, followed by Belgium (8.3 per cent), Italy (6.8 per cent) and Britain (6.3 per

per cent.

cent).—Reuter.

it would defer the lay-offs. In a statement, the company added that it expected that the proposals by the executive would be relayed to an early mass meeting of members of the staging department and it hoped this would result in a return to normal working.

Cammell—which has given warning that the strike has placed the future of shipbuilding on Merseyside in jeopardy—took out temporary injunctions against the strikers to prevent them picketing the vessels vent them picketing the vessels and preventing other workers

from carrying out their jobs. Last night the company said it had agreed to withhold the in-

#### Seoul fights for US textile quota

a result of an initiative by the executive of the Boilermakers

Society, the company said that it would defer the lay-offs.

Seoul, Aug 23.—America opened its second round of talks here today for a new tex-tile quota agreement with South Korea.

The first round of negotia-tions in Washington ended in a deadlock over how much South Korea would be allowed to increase its textile exports to the United States during the

next five years.

Mr Michael Smkh, a White House trade negotiator, led a six-member negotiating team, accompanied by a group of 11 advisers representing the textile industry and unions which demand tight import restrictions. current agreement

which expires at the and of September, allows an overall annual quots growth rate of 6.25 per cent, but South Korean sources said that the United States wanted to reduce it to 4 per cent, with still more severs growth rates for sensi-tive items such as woollen clothing, synthetic fibre sweaters and shirts, which are more in demand.—AP-Dow

said yesterday that the current account for calendar 1977 would

#### Japan revising forecasts

Tokyo, Aug 23.- Japan's Ecobut finance ministry officials momic Planning Agency said the Government would have to revise itseconomic forecasts for the 1977 fiscal year ending March 31, 1978, including that

probably show a surplus larger than the \$7,000m forecast by the Organization for Economic Co-operation and Development. Agency officials said the target of 6.7 per cent economic the year of a \$700m (about growth for fiscal 1977 would £402m) current account deficit, remain unchanged.

#### LETTERS TO THE EDITOR

The Cost of Living Advisory

#### Separate indexation for low paid is needed

From Mr Chris Pond Sir, The increasing importance of the Retail Price Index in the new era of "indexation" was highlighted in your columns by Mr J. L. Nicholson who has called for more resources to be devoted to perfecting the methods of its construction (August 13, 1977). Mr Nicholson's case is a strong

construction (August 13, 1977). Mr Nicholson's case is a strong one and should be taken seriously.

Indexation marks a change in the role of the RPI from that of an economic indicator, to one of the most important instruments of social and incomes policy at the Governmortiments of social and in-comes policy at the Govern-ment's disposal. The living standards of pensioners and the recipients of other forms of benefit devend on changes in the index for compensation against increases in their living

Movements in the RPI also Movements in the RPI also determine the standard of living of wage and salary earners, either because it is used to adjust their wages, or because the amount of income tax they pay is dependent on the increase in prices measured. Akthough the RPI was never intended as a measure of changes in "the cost of living" that is what it has become. This changing role demands the commitment of increased resources to ensure that the resources to ensure that the index fulfills its new responsi-

bilities adequately.

An improvement in the accuracy of the RPI itself will how-ever go only part of the way. The use of a single summary measure of price changes con-ceals the fact that "the cost of living" changes at different rates for different social and economic groups. It has been estimated that the expenditure pattern on which the RPI is based corresponds to that of households between two thirds and three quarters of the way up the income scale.

Households on average or low incomes devote a larger proportion of their expenditure to necessities and, since these items have risen fastest in price in recent years, it follows that the cost of living of these households has also increased.

£278m Paris transport subsidy kated for instance that in the three years to March 1977 prices increased by five percentage points more for low than for high income households (taking the top and bottom 10 per cent as representatives of "low" and "high" incomes).

The implications of this are

Transport
Sir, While we in London Trans-Sir, While we in London Transport are delighted to see that our friends in Paris produced a trading surplus in 1976, we are a little surprised that Business Diary in Europe (August 22) failed to mention that RATP (the Paris equivalent of London Transport) received a total subsidy from public funds of 2,408m francs (£278m in sterling equivalent) as compared with London Transport's £114m to run a significantly larger The implications of this are obvious: if wages, benefits or taxes are adjusted by the sin-gle official price index, low in-come groups will be undercom-pensaced for the effects of inpensaced for the effects of in-flation, and attempts to protect the living standards of this group will be frustrated. The Government already publishes separate price indices for pen-sioners which have in recent years registered price rises considerably above that of the general index, but which are not used to adjust pensions themselves and cannot be taken as fully representative of the experience of the poor in general. to run a significantly larger public transport operation. Put another way, revenue subsidies in Paris for the year 1976 amounted to 55 per cent of expenditure as against 30 per cent for London Transport in the same year. Indeed, for 1977 revenue subsidies for London Transport will probably account for only 23 per cent of expendi-

Last year RATP was able to spend five times as much on investment as London Trans-port. If we had access to funds The Cost of Living Advisory Committee, who recommended the construction of the pensioner indices ten years ago, also proposed that further consideration be given to the need for another index for large, low income households. No such official investigation has since taken place. Yet the Covernment has declared itself opposed to the principle of a special index for the low paid. In this the United Kingdom is out of step with countries port. If we had access to funds of that order, modernization and updating of Underground stations, and indeed all our facilities, would be at least as rapid as in Paris.
Yours faithfully,
KENNETH ROBINSON,
55 Broadway,
Westminster.

Westminster, London, SWIH 0BD.

## In this the United Kingdom is out of step wish countries where indexarion has a longer history: Denmark, Italy. The Netherlands and the United States each have a separate index against which wages are adjusted. Germany and France Laker honour?

From Jevan P. Berranger.
Sir, May I suggest that Mr.
Fred Laker be included in the
next Honours List for his services to the British people in bringing down prices by forcing British Airways and other airlines in the IATA "carre!" to halve the cost of trans-Atlantic air fares. His example of British enterprize and persecutive and p verence in the face of opposi-tion by the big betallions makes this achievement all the more commendable. Yours faithfully, JEVAN P. BERRANGE

24 Wentworth Mansions,

#### Life offices and company pension plans formation on which to make truth of this and should be an intelligent decision. A glad of the opportunity to 523

have a whole battery of indices to measure the impact of infla-tion on different social groups.

Given the problems of res-training the present RPI offi-

cial opposition to a separata-index for the low paid is un-derstandable. But until it is equipped with such an index,

the Government cannot be sure of fulfilling adequately its commitment to protect the living standards of this group.

Yours faithfully,

an intelligent decision. A number of life offices have published on July 26 (Making subsequently been in touch with me pointing out that the right decision over pen-sions) I perhaps implied that nearly all their quotations are issued at the request of inter-mediantes acting as advisors to the feels by mainly with the life offices for presenting a o offices for presenting a the companies concerned and that these requests are not cont with the result that mecessarily in line with their employers had enough in own thoughts. Social costs may eventually & N out of the business, but in antime this traditional element of cations will provide ample funds for deation. A point appreciated in the rice, near its "high" for the year up 1p yesterday.

Mr Harry Oppenheimer, chairman of De Beers Consolidated.

#### Growing importance to Anglo

The De Beers money-making machine has turned in an extraordinary first-half per-formance with attributable profits of R285.3m (about £158m) coming close to the profit for the whole of last year of R308.5m, The results have far surpassed stock

market expectations, which in the main had been anticipating earnings per share of 60 to 65 cents against an actual 79.3 cents. Vague market rumours of another impending diamond price increase are now

likely to turn to a clamour with the company's comment that the 15 per cent increase in March "has been absorbed and the market remains firm ".

Diamond profits rose by 76 per cent to 380.1m in the first half compared with a per cent increase in the level of sales the central selling organization which demonstrates the benefits that accrue to the company when the diamond stockpile is drawn down with prices going up. So after these results, market estimates of total earnings per share this year of 110 to 120 cents are looking somewhat pedestrian, particularly if another price increase is brought about.

The question now is how De Beers will utilize its ever growing cash mountain. Last year cash had risen from R187.4m to R470.3m while loans at the year end were little changed.

Admittedly, considerable cash resources have to be beld to finance the diamond stockpile-which last year fell by R76.9m to R227.5m-in the event of a downturn, since the company's ability to buy in other producers' stones and hold them through a recession is integral to the maintainance of the Central Selling Organization's marketing

Even so, that still leaves a lot of leeway. and the merger of Rand Selection and Anglo which resulted in De Beers ending up with a one-third equity holding in Angle, may provide an outlet. De Beers has frequently been involved in Anglo group projects outside the diamond industry, but its involvement may now become greater.

Admittedly, Anglo now has an enlarged base, but it could be significant that De Beers took such a large slice (11 per cent) of the recently-listed East Rand Gold and Uranium Company (Ergo).

With Charter Consolidated having faded from its original role in the Anglo empire and now seemingly intent on building up its industrial side, De Beers could now emerge increasingly become the link between the South African interests and the outside

The expansion of De Beers in the diamond industry has its limitations (particularly with negotiations with the Botswana Government over Jwaneng bogged down) and a strong move into other fields within the Anglo empire has its advantages. Although De Beers is bought as a diamond stock rather than anything else, its current rating can well support further moves in other

Even at now unrealistic estimate of earnings per share of 120 cents, the shares at 263p are selling at a mere 3 times earnings. After a 171 cents interim dividend, a total of 45 cents seems reasonable to give a prospective yield of 10 per cent cum premium lonly been achieved because

## Advertising is looking good, but is it only display?

Advertising or at any rate that part of it which is most visible to the layman, appears to have made an unexpectedly strong recovery during the first half

While the figures for the second quarter have not yet been completely analysed, it is clear that the real gain in private sector manufacturers' advertising to consumers which was recorded in 1976 has been more than maintained, and the indications are of more growth in the next six months.

If the trends continue, real spending in this section of advertising will be back to the ecord levels of 1973 by the end

of the year.

The improvement is, however, being regarded with caution by the advertising industry. It is aware that the projected gains for the second half of the year could be wiped out by a number of adversities, ranging from market changes and industrial disputes to general economic

Economists in the industry also stress that the results available so far relate only to one section of advertising. The business is split broadly into three categories: display adver-tising, which includes private sector manufacturers advertising to consumers, represents nearly 70 per cent; then there are trade and technical advertising, which represents 8 to 9 per cent, and classified advertising, which accounts for more than

Each of these sectors, and the sub groups within them, respond at different rates to varying stimulants,

During 1976 the improvement in display advertising and, within that, manufacturers consumer adversiting (which accounts for about 60 per cent), was more marked than that shown in the other categories. At present prices manufacturers' consumer advertising increased by 27 per cent over the figure for 1975. Display advertising from other sources, such as the Government, nationalized industries, savings and financial institutions and retailers, collectively went up by only 20 per cent.

Classified advertising and, within that, recruitment advertising fell in real terms with a rise in current prices of only 17 per cent. While advertising in trade and technical journels recovered in 1976, the

crease was not sufficiently marked to cancel out the sharp decline which hit all advertis-ing in 1974 and 1975. The overall result of the

The overall result of the various advertising components was an expenditure total for all advertising of £1,188m, an increase at present prices of just under 23 per cent on 1975. At constant (1970) prices, however, the overall results show little, if any, real gain on the previous year. previous year.

The caveats spart and accepting that the industry is climbing back from a low base, the expenditure totals for display advertising for the first half of 1977 show impressive urther interest which are shead of creases which are ahead industry forecasts.
Figures produced by Media Expenditure Analy (MEAL) research compa

Media Expenditure Analysis (MEAL) research company shows a rise of 22.5 per cent in press and television advertising spending at current prices over the figures for January to June, 1976. This compares with a forecast by the Advertising Association of a rise of about 20 per cent for the first quarter and 15 per cent for the second. The MEAL figures substantiated by the precise net advertising earnings released monthly by the independent television companies. These

show a gain of 27 per cent, again at current prices, for the six-month period.

The Independent Television Companies Association's actual figures compare with a fore-cast rise of 18.2 per cent for the first quarter and 6.9 per cent for the second.

A more detailed analysis produced by MEAL for the first quarter adjusted to constant (1970) prices reveals a real

## MANUFACTURERS' CONSUMER ADVERTISING Expenditure in 1970 prices

growth of 10.5 per cent, compared with an expected decline of 5 per cent on the same three months of 1976.

More subjective signs that advertising volume is reaching 1973 levels is the near saturation of some of the larger independent television stations. One company, Thames, has said that it will have to ration airtime this autumn and is already turning away business. ing away business.

It is, incidentally, an indica-tion of the general uncertainty whether this relative prosperity will continue that some contractors are offering cheaper rates to advertisers who are prepared to guarantee them a fixed percentage of their television advertising budgets.

For the future, a survey of marketing intentions for the next six months, carried out for Marketing magazine, shows a high level of optimism.

The proportion of all consumer goods manufacturers intending to spend more on advertising was 44 per cent, while 11 per cent expected to As already indicated, con-

sumer goods manufacturers accounted for most of the growth in advertising spending in 1976. This category has led the even more pronounced recovery in the last six months. The broad tendency has been for the existing big advertising spenders—ie, those with higher advertising to sales ratios-to

Television has received the largest part of the increase. In the first quarter press adver-tising went up by 19 per cent, comparied with a rise of 39 per cent in spending on television In the first six months overall, press advertising went up by 21.7 per cent against a net rise in television revenue of

The traditional assumption me out in previous years has ben that the returns for television, issued severa months ahead of precise figures for other types of advertising, a reasonably accurate indicator of general advertising trends. The assumptions are that television is the first to reflect changes, with press dis-play advertising following and classified and industrial adver-

tising moving in the same direction later. On this basis, the signals are that advertising in all its forms is about to enjoy a return to buoyancy. However, a closer analysis of the components of the recent growth shows why the industry is nervous about drawing any long-term conclu-sions about it.

During the first quarter, the product categories showing the biggest increases (seasonally adjusted and at constant prices) over the last quarter of 1976 have been holidays; drink, household appliances, food, publishing and household

Of these, the biggest and most important group is food, whose advertising spending accounts for a high proportion—about 17 per cent as measured by MEAL—of display advertising. The bulk, nearly 90 per cent, of the appropriation goes to television. Having shown little variation

at constant prices seasonally adjusted over the last three years, expenditure on food during the first quarter in-creased exceptionally, with a real growth of 29 per cent. This single category was therefore a main contributor to the rise in television spending during Looking at food in more deteil, it can be seen that much

few products, such as flour, margarine, cheese and bread. A year ago advertising spending for these products was below the 1973 level even at current prices, but it was well above in the first quarter of 1977.

هَلَذَا مِنْ لِلْصِلْ

Manufacturers' decisions to alter advertising spending relate to conditions within the particular markets in which they trade. There is, for example, a direct correlation between advertising spending on margarine and the retail price of butter.

Increased adevtirsing spending may also take place in an except to hold declining sales, as, for example, of foreign tours and holidays. It may also be a response to competitive pressures within the market, such as hapepned with tobacco, with first the king-size cigarette price war and secondly the launch of substitute tobacco creating intense marketing pressures against an overall background of static sales.

At one time, it was thought possible to regard movements in advertising spending as a pointer to overall national economic conditions. But the present view of some economists in the industry is that the variations within the indistinguished section. advertising spending as vidual sectors are too great for it to act as any sort of reliable short-term indicator.

This year, apart from the difficulties of smoothing our distortions from more or less normal variations, the effects of price and profit margin con-trols have also to be taken into account. The second half of the year got off to a good start with an exceptibally big increase of almost 23 per cent in television advertising in Iniv. It may or may not be July. It may, or may not, be significant that this was the month when the system of price control changed from a fairly rigid to a flexible structure.

While increases in advertising costs were not allowed under the old Price Code to be offset against price increases they were lumped with trading expenses for profit margin con-trol purposes. It is not yet clear how any heavy incrweases in advertising spending will be viewed by the new Price Commission. Some of the big con-sumer product manufacturers may hold back from fixing new appropriations until firmer guidelines have been estab-lished.

## Taiwan: export successes in spite of all

As the US Secretary of State continues his talks in Peking,

country which has been a longstanding source of

tension between America and China.

Peter Hazelburst looks at the economy of the

No strikes, low wages, a basic 44-hour working week without overtime, and e booming Taiwan into east Asla's new

This oversimplified formula for economic success is offered by Mr C. F. Wu, the edviser to Talwan's Ministry for Economic Affairs, as he explains how the island of 16 million Chinese has more than exceeded its growth pargets in recent years.

The formula certainly works. Last year Taiwan achieved a growth rate of 11.7 per cent, exports rose by 53 per cent to \$8,200m (about £4,713m), infletion was held down to less than 3 per cent and the prospects look just as bright this

While denying suggestions that strikes are in fact banned under law in Taiwan, Mr Wu admits that the basic secret behind the country's phenomenal economic growth is a lack of trade union activity as known to the West or Japan.

The explanation is simple, Mr Wu points out that the island can only hope to achieve a target of 8.5 per cent growth this year if exports increase by at least 16 per cent. Private economists and ineffective union leaders claim that the boom in exports has

strikes have been outlawed to provide Taiwan with a com-petitive edge over Japan and other manufacturers of rexiles,

electronic goods, machinery and plastics. At the same time low wages and other incentives had attracted \$1,500m in foreign investments by the end of last

Just over 83 per cent of all foreign investments in Taiwan are concentrated in electronic, metal, chemical and machinery plants where skilled and unskilled workers earn an average salary of \$150 a month.

In many plants where labour unions are suppressed by law, young girls on production lines earn as little as \$2.5 a day.

On paper the constitution provides Taiwanese workers with the right to strike but in effect the clause is superseded by respective regulations.

by repressive regulations which outlaw any form of militant trade union activity.

Mr Wu argues chat dissatis-

local bureau for social welfare

if they are being exploited.

"Last year there was an average wage increase of 17 they are being exploited. per cent while inflation did not rise above 3 per cent", he

<sup>a</sup> We believe in negotiations rather than strikes. In the first place we are still on a war footing. Strikes will disrupt

our social security.

"We do not have strikes here because there is a great demand for labour. The unemployment rate is less than 2 per cent and I believe the question of supply and demand obviates exploration."

market in future even if wages continue to rise at the present rate. According to the latest pro-

jections Taiwan's exports are expected to rise to \$9,500m this year to provide the country with a surplus trade balance of \$500m.

"We can maintain a com-petitive edge in the near future even if wages shoot up. Our base wage is very low. We are also attempting to switch to capital and technical inten-sive industries in the near future", Mr Wu said.
"The Government is now im-

He is convinced that Taiwan plementing a plan to train an will continue to outbid its com-additional 263,000 skilled petitors in the international workers by 1982."

While Taiwan's low-priced export commodities have raised the backles of competitors and trade unions in the United States, Europe - and there can be little doubt that exporters are working against extreme odds.

With the exception of the United States, Taiwan is offi-cially ostracized by the gov-ernments of the industrialized West and Japan and sherefore does not enjoy formal trade privileges in the international

Explaining Taiwan's dis-advantages, Mr Wellington Tsao, secretary general of the privately constituted Euro-Asia Trade Organization, says: "In the first place Europe does not maintain diplomatic relations with Taiwan so we do not enjoy most favoured nation treatment.

United Nations so are not in the United Nations so are not included in Gatt. We are not consulted on quotas and because Taiwan is not included in the Third World there are differentials in pariffs."

#### FINANCIAL NEWS AND MARKET REPORTS

Stock markets

## Struggling to recover buoyancy

account appears to be maintaining its lethargic traditions. There were signs at the outset yesterday that sheres were struggling to restore last week's momentum but genuine buying interest looks thin at week's momentum but genuine buying interest looks thin at present and an attempt to recover buoyancy was quickly stifled by the latest unemploy-ment figures.

Gilts picked up initially, still hopeful of a further cut in Minimum Lending Rate, but the impetus soon faded and many Government stocks closed as much as \( \) down, although after hours trading saw quiet gains of between \( \) and \( \).

The FT Index finished at 483.7, down 1.9 on balance, after 487.2 at the beginning of the day's trading. Leading issues such as ICI, GKV and

Septerber 8 Cadbury Schweppes is expected to report on the half year to June 30. Some say that it will turn in profits of around \$19.5m against £16m thanks in part to a strong recovery in North America, At scovery in North America. At 52p Cadbury now offers a size-able yield advantage over Rowntree whose record how-cucr is preferred by many.

changed and a scant few achieved any gains. Unilever at 512p and Becham Group at 583p were both cropped by 4p, aithough Lucas held on to a 6p advance to 310p on hopes that its labour problems will shortly be solved and Turner & Newall ended to up at 195p on fur-ther consideration of its United States ambitions.

But, not for the first time, it was left to situation stocks to turn the wheels of business over. Steels group Samuel Osborn was one of the more porminen tleatures here and

appeared from the ilmelight completely.

Strong interim growth at Ocean Transport & Trading was good for a 4p rise to 163p and, coincidentally, Ocean's former bid target, Hay's Wharf, advanced 6p to 134p on revived FUGIOUES.

The alarms industry set several shares ringing and the announcement that Racal Electronics has hoisted its stake in Brocks Group—which also unveiled encouraging profits—from 5 per cent to 11.33 per cent certainly appealed to dealers and the shares climbed 3p to 85p. Glanfield Securities enjoyed another day of strong enjoyed another day of strong demand and scored a further 12p gain to 185p. The market however is rather thin. Speculative buying spilled The option market quietened over into Jonas Woodhead again and the formightly busi-

again and into Brent Chemicals and good results supported engineering group Woodbonse & Rixson, which climbed 2 p to 31 p. Houchin, which had been in good demand on Monday, advanced to 135 p while other companies reporting yesterday included Abrasives International and Cableform, which also scored rises.

Over on the property pitch.

Over on the property pitch, Centrovincial responded to a reassuring statement on degearing with a 1p gain to 67 p, although there is stil ino divialthough there is stil ino dividend. Other stocks in this sector to stand out included MEPC, with a 2p rise to 93p, and English Property Corporation added 11p to 44p.

Marked trends were difficult to spot in other areas. Leading building issues came off by around 1p across the board while press comment helped while press comment helped lift UDS group by a like amount to 76p and others such as

to 76p and others such as British Home Stores and Marks & Spencer were similarly improved.

Thos Ward is attracting some attention from brokers for yield (11.5 per cent) and hopes wield (11.5 per cent) and hopes for recovery next year if not this one (to September). Gossip about a sale of the Tunnel Holdings stake has died for the moment but now there is talk, but no more, of dalliance with Tarmac. Ward's shares held steady at 49p where they are still a long way from the 1976-77 high of 601p.

were ICI, Shell, BAT Defd. Unilever, General Electric, BOC International, Midland Bank, Royal Insurance, Burmah, Beecham Group, Barclays Bank, GKN, Imperials Group, Samuel Osborne, Jonas Woodhead and Hawthorn Baker.

Preference dividend of R1 per share declared 17th May 1977	795	793	
Second preference dividend of 4 cents per share declared 17th May 1977	115	115	
Cost of interim dividend of 17.5 cents per deferred share (1976: 12.5 cents)	62 963	44 974	

It should not be assumed that the results for the half-year ended 30th June will be repeated in the half-year ending 31st December, since income does not necessarily accrue evenly throughout the year.

As a result of a further re-arrangement of shareholdings As a result of a further re-arrangement of state-holdings in the diamond trading companies, the Group disposed of three per cent of the share capital of The Diamond Purchasing and Trading Company (Proprietary) Limited ("PURTRA"), which consequently has ceased to be a subsidiary company. The results for the half-year are therefore not directly comparable with the corresponding partial in 1976 because PURTRA's results have not been period in 1976 because PURTRA's results have not consolidated and only dividends received from that company are included.
DIAMOND MARKET

The high level of sales and profits as compared with the corresponding period last year relates in part to the liquidation of old stocks. The price increase of 15 per cent made in March is being absorbed and the market remains

MERGER OF ANGLO AMERICAN CORPORATION OF SOUTH AFRICA LIMITED AND RAND SELECTION CORPORATION

Following the merger of Anglo American Corporation and Rand Selection Corporation in May 1977, and related transactions, the Group's interest in Anglo American Corporation has increased to 33.15 per cent of the equity share capital.

INTERIM DIVIDEND

INTERIM DIVIDEND
Declaration of Dividend No. 115 on the Deferred Shares
An interim dividend in respect of the year ending 31st
December 1977, being dividend No. 115 of 17.5 cents per
share (1976: 12.5 cents) has been declared psyable to the
holders of deferred shares registered in the books of the
Company at the close of business on 30th September 1977, and
to persons presenting coupon No. 59 detached from deferred
share warrants to bearer.
A notice regarding payment of dividends on coupon No. 59

share warrants to bearer.

A notice regarding payment of dividends on coupon No. 59 detached from share warrants to bearer, will be published in the press by the London Secretaries of the Company on or about 23rd September, 1977.

The deferred share transfer registers and registers of members will be closed from 1st October 1977 to 14th October 1977, both days inclusive, and warrants will be posted from the Johannesburg and United Kingdom transfer offices on or about 27th October 1977. Registered shareholders paid from the United Kingdom will receive the United Kingdom currency equivalent on 18th October, 1977 of the rand value of the dividends (less appropriate taxes). Any such shareholders may, however, elect to be paid in South African currency, provided that the request is received at the Company's transfer offices in Johannesburg or the United Kingdom on or before 30th September, 1977.

The effective rate of non-resident shareholders' tax is 15 per

#### Toy sales send Cowan de Groot on Strong tack By Alison Mitchell

First-quarter turnover at toy-First-quarter turnover at toy-maker-to-electrical wholesaler Cowan, de Groot is well shead of the May to July period last year, a confident chairman, Mr Derrick Cowan, tells share-holders in the annual report. And with forward sales up by about a quarter in most divisions the group could be on the way to bearing last year's £1.8m pre-tax profit.

the way to bearing last year's £1.8m pretax profit.

In the 12 months to April 30 the toys and giftware division pushed up its profits contribution by more than 50 per cent to £690,000 as a result of increased mail-order business and larger range of John Buli products, including jewellery and farmyard modelling outfits as well as the printing sets. Mr Cowan pointed out that the group's expansion into the giftware trade, with its summer sales, has helped to offset the cyclical and seasonal problems cyclical and seasonal problems Electrical Wholesalers, the Dublin-based company taken Dublin-based company taken over about two years agn, now accounts for more than 10 per cent of group profits. This off-shoot is expanding into Waterford and Limerick and the chairman expects it to increase its contribution in the future.

The accounts show that the company has less cash than at the same time last year—\$471,000 against \$747,000—due mainly to a proportion of the mainly to a proportion of the earlier balance consisting of

funds on medium-term loan for acquisitions.

"More than £400,000 has been used for this purpose during the year," he says. But the group is also carrying higher stocks. Full production at the Risley factory of Millbrook Plastics means a greater level of turnover while the acquistion of hardware wholesaler W. F. Horwood & Co (Bristol) at the end of last year included stocks. The may and giftware side of the business imported a large proportion of stocks funds on medium-term loan for

A note to the accounts shows that four, including the chair man, now receive salaries of more than £30,000 gross, against none last year. This results from a change in service agreements giving them a small per-centage of profits over £500,000, on top of their basic salary.

large proportion of stocks earlier than required to avoid the risk of adverse currency fluctuation and higher import

#### **Selection Trust buys Century** Aluminium for £1.4m

By Tony May Talks over the possible porhase of Century Aluminium by Selection Trusts subsidiary, Amari, have been successfully

In a deal valuing Century at Elm Amari has acquired 93.5 per cent of Cennury's equity, and the remaining shares will continue to be held by the executive directors, on terms which provide a formula for their purchase by Amani in the future The two biggest shareholders

The two biggest shareholders in Century were Noble Grossart, the Edinburgh-based banking and merchant banking group, and Alpine Holdings, the aluminium windows concern. These two were in Century from its formation in 1969. Noble Grossart had a stake of 40.0 per cent and Alpine one of 36.7 per cent. Over the year to June 30 the group made a pre-tax profit of £350,000 and had net assets of just over £1m. In return for its 40.4 per In return for its 40.4 per cent stake in Century, Noble Grossart has received £574,000. This compares with a cost of

Mr A. Chester Beatty, chairman of Selection Trust.

£130,000, so Noble Grossart has made a paper profit of just over £400,000 after an association of eight years. Noble Grossart, which has North Sea exploration interests, has elready signalled that it is building up its banking business. ing up its banking business, and is confident about pros-

pects for the current year.

Meanwhile, Alpine says that it has received £520,500 cash for its near-37 per cent stake and is also to be repaid loans of £24,000 previously made to Century. The book value of Alpine's investment in Century at January 31 excluded the loans was £191,000—including accumulated profits of £92,000. Pre-tax profits of Cantury astributable to Alpine's interest for the year to January 31 was for the year to January 31 was £82,000, compared with a loss of £78,000.

of £78,000.

Amari, which is a major independent abuninum stockist,
will be absorbing Century into
its Aalco group of companies,
which hold stocks of stainless
steel and non-ferrous metals
besides aluminium. It enjoyed besides aluminium. It enjoyed a record year, and made a con-tribution of £2.5m to the oper-ating profits of Selection Trust-over the year to March 31, com-pared with a loss of £143,000-a year earlier. The loss reflec-ted the alump in demand caused by the depression.

The good result was attri-buted by Amari to better trad-ing conditions and in part to higher productivity.

#### Johnson's sound start justifies bid defence

A record year is under way at Johnson Group Cleaners, the group which stood firm against a £4.7m bid from rivals Skerchley earlier this year. Over the six months to June 30, pre-tax profits weat up from £530,000 to £625,000, on sales of £9.22m against £8.1m. This indicates a rise in marging from 6.5p to 6.7p. The improved trend of the first six mouths is reflected

in better sales for July.

The board says that investment in the group's "Apparelmaster" workwear and "Candy" continuous, towal service is building up as sales increase. The integration of the Metro business which was purchased from Alfred Marks Bureau for £265,000 cash in January, has made for a "significant improvement" in profits of the dry cleaning division. in better sales for July.

fits of the dry cleaning division.

Over the whole of 1976-77,
the group brought in a pre-tax
profix of £1.43m compared with £1.42m. The small edvance re-flected a drop of 24 per cent in first-half profits, as family budgets were being squeezed, and the heatwave was in any

case depressing retail tracing generally. The second half saw the group making up all the lost ground, and this trend has continued into the present year.
Sharebulders are being sent
a gross interant dividend of
1.92p compared with 1.746p,
and a second interim of 3.96p

and a second interim of 3.96p is forecast to give a maximum peyment of 5.85p against 5.36p for 1976-77. The dividend for 1976-77 was itself, boosted 50 per cent as part of the group's takeover defence.

The results saw the group's takeover defence.

The results saw the group's takeover defence at 494p, which compared with the offer of about 42p a share in cash and paper from Sketchley made in February. The shares at that time were about 48p.

The bid finally foundered after being referred to the after being referred to the Monopolies Commission. Monopolies Commission. Sketchley decided to call the deal off irrespective of the outcome. It had intended to expand its industrial workwear factories, using Johnson. Sketchley could not postpone its decision and so opted to buy factory space independently.

#### Racal increases stake in Brocks but denies bid

By Michael Clark Shares of the Brocks Group of Companies rose 3p to 85p of the news that Racal Electronic has increased its stake it Brocks and now holds 11.33 pe cent of the capital. However, Racal has repeated its statement, made earlier this month that it has no intentions of making a bid for the remainder Brocks.

Brocks.

Interim results of Brocks, which makes electronic marin navigational aids, burgle, alarms and car radios, shows jump in pre-tax profits of 20.; per cent to £566,000 in the simonths to June 30. This was achieved on a turnover up from £3.8m to £4.9m. Its interindividend is raised from £91, gross to 2.12p., and the boar. gross to 2.12p, and the boar expects to pay the maximum per mitted total.

Results of the group for the last full year showed a rise is pre-text profits from £582,00 to £855,000. However, 1975 figure was stated before adding 2305,000. Those were management charges to former sub-

#### Interim results

The Directors have declared an Interim Dividend of 3:8607p (1976 -3.4835p) per stock unit. An additional special Interim Dividend of 0.0591p per stock unit will be paid as a result of the recent retrospective reduction. in Advance Corporation Tax.

The aggregate amount of 3.9198p per stock unit will be payable on 1 November 1977 to stockholders on the register of members on 26 September 1977.

Taxation-The provision for tax equalisation has been dispensed with, as it is no longer considered necessary, resulting in a reduction of £6.8m in the tax charge for the half year to 30 June 1977. The comparative figures for 1976 have been amended accordingly. Advance Corporation Tax on dividends is included as part of the tax charge.

Prospects-The interim figures are in line with our May forecast that pre-tax profits for the year would show a further useful improvement. Although expectations for the remainder of the year are not quite so buoyant as they were, nonetheless we still expect the pre-tax profits for 1977 to exceed those of 1976. The level of profits expected in the second half of the year is affected by the transitional effects of the containerisation by O.C.L of the New Zealand and South African trades.

The mystery man trying to buy shares in Abwood Machine the Leech prchase is the attractive land bank built up by Victor Balding, chairman and Owen. If revalued it is estimated that the land, in Owen's book at cost, would increase net book at cost, would increase net assets from the current £640,000 to at least the film purchase

> Good start after Houchin reaches £1m

On turnover up from £4.49m £4.57m, pre-tax profits of Houchin, makers of aircraft ground-power equipment, rose from £926,000 to a record £1m in the year to April 30. The dividend is being raised by the maximum allowed, from 50 to 5.5p gross. Houchin's balance sheet "is even stronger than last year", the board reports. The current year has started "very satisfactority" and the order book is running at record levels.

Recovery omens at Meat Trade Suppliers

Results of Meat Trade Suppliers, London based maker of sausage casings and butchers equipment, show a recovery with a rise in pre-tax profits of 8.4 per cent to £461,000 in the year to April 2. Turnover is up from £8.7m to £10.2m and earnings a share are 9.6p compared with 8.7p. The final recommended dividend is 5.9p making a total of 10.9p gross compared

#### Seventh peak | Woodhouse plunges but signs of pick-up from Pifco;

By Ashley Druker
Sheffield forger and flange maker Woodhouse & Rizson turned in a drab showing in 1976, chiefly because of the coffapse of the flange market. In the opening half to July 2 last it reports an improved performance compared with the final stage of 1976 though profits again show a steep plunge.
On turnover up from £539m to £6.21m, taxable profit fell sharply from £534,000 to £151,000. There is no tax charge, and earnings a share come out Record profits for the seventh year running are returned by Manchester-based Pifco Holdings. Trading profits were up by 24.9 per cent to f1.12m in the year to April 30. Taking in investment income little changed at £246,700, against £238,600, the pre-tax total is 20.4 per cent greater at f1.37m. Sales were not given in the preliminary figures. The better results arose from Pifco's increased volume and market

and earnings a share come out at 1.5p compared with 5.3p. On at 1.5p compared with 5.3p. On this it pays an interim dividend lifted from 1.6p gross to 1.75p.

Hopes six months ago were that flanges would move off the bottom of the industrial cycle are being fulfilled, though tough going was met in the latest six months. Generally good levels of profit were maintained in the latest half by the forging, soring and trailer com-

forging, spring and trailer com-

panies in difficult trading conditions. But Mr Scott Baker, chairman, says that overall results have been affected by losses in the flange sector.

As for the rest of the year, has a contract that management of As for the rest of the year, he reports that management of the group's Beigian company has been strengthened and overall orders for flanges are improving. With extra capacity becoming available at Cockers, he believes the group is well placed to take advantage of increased demand for laminated springs.

ated springs.

In April Woodhouse com-bined with a Kenyan company, Dynamics Engineering, to form Cocker Dynamics for laminated spring production—owned 26 per cent by Woodhouse and the remainder by Dynamic. It was to be in production by year-end. Meantime, over £2m has been spent between 1975 and 1977 on new plant and equipment and their full profit potential

#### Appeal to shareholders in Abrasives' family clash

A bitter boardroom row is brewing up at Solihull-based Abrasives International Mr Colin Ashworth, son of the group founder and brother of the current chairman, is calling an extraordinary meeting to try to remove the existing directors and elect himself and three others to the board. Mr Ashworth was asked to resign

trend. The market essentially depends on the individual consumer, with spending limited by the rise in the cost of kiving. as a director in 1974. Mr Stewart Ashworth, chairman, advises shareholders to reject the resolutions and promises group pre-tax profits of ground £80,000 in the 12 months to December 31, against £6,000 last time. The annual dividend is also to be stepped up to 2.12p, giving a gross yield of around 12 per cent.

A statement by Mr. W. A. de Vigier, Chairman of the Acrow Group

Your company's profits topped the £10 million mark for the first time – £10,729,260 against previous year. This outstanding result has been achieved because of the enormous growth in the company's exports to £68 million or 61% of turnover of U.K. companies. In Acrow, everyone's

efforts from apprentice to chairman

have always been concentrated on

export achievement.

Another of the main achievements of Acrow companies in this year of high unemployment in the U.K., has been to maintain all our factories working to full

. We believe in investing in Britain hence the current extensions to our factories in Sunderland, Darlington, Grantham and Stockport and the building of a £3½ million new factory to produce steel containers in Reddish.

Large sums of capital have been earmarked for the modernisation of our machine tools in order to increase further productivity in our Hull, Saffron Walden, Maldon and Harefield factories

We are also vigorously pursuing product development to ensure that your company remains the leader in the fields

in which it operates.
In Acrow we are confident and optimistic about the future, the first four months of the current year indicate. a further substantial increase in both

a further substantial increase in both sales and earnings.

I would like to thank the whole Acrow team both in the U.K. and overseas for the loyalty and devotion they are showing to the company and for their constant efforts to ensure the continued growth of Acrow growth of Acrow.

#### **COMMODITIES AND MARKET REPORTS**

#### **Outlook for** stabilization of coffee prices 'good'

By Wallace Jackson Commodities Editor

Although 11 Latin American droucer countries are discussing in Mexico City systems to stabilize both short and long term coffee prices, it seems clear that any proposed action would be taken in agreement with con-sumers through the later-national Coffee Organization

Camillo Calazans, Senor president of the Brazilian Coffee Institute, is quoted by Reuter from Mexico as saying that there is no intention of operating a cartel on the lines of the Organization of Petroleum Exporting Countries.

He said that as no coffee producer was now holding reserves it would be easier for them to achieve a consensus on ways of defending prices in the short term. The longt-erm prospects of setting-up a stabilization system were good.

Señor Calazans criticized some producer countries which had continued to sell coffee stocks durin grecent price falls while possessing means to con-trol exports, although some countries had been forced to continue selling through econo-

In addition to Brazil, the meeting is being attended by Bolivia, Colombia, Costa Rica, El Salvador, Ecuador, Guate-mala, Honduras, Nicaragua, Venezueia and Mexico.

The talks are being held ahead of a meeting of the executive board of the ICO in Nairobi next Monday and a full council meeting in London towards the end of September. Mexican officials are hoping that a working aroun to study that a working group to study mechanisms for long-term stabi-lization will be set up at these meetings.

Discount market

For the second day running, the Bank of England intervened to op up surplus credit on Lombard Street yesterday. The authorities sold a moderate amount of Treasury hills directly to the houses, but still probably left some money in the system to carry over to today.

The market was rather patchy during the day, with some houses extremely comfortably placed and others still looking for balances. However, rates eased gradually from an opening of about 6 per cent down to a level of 41 per cent down to a level of 41 per cent down to a level of 42 per cent down to a level of 42 per cent down to a level of 43 per cent at the close. The surplus was created by a substantial excess of Government disbursements (chiefly rates support grant and housing morties) over Reveaue transfers to the Exchequer.

This one factor very easily took care of the slightly run-down balances brought over from Monday, a sligh met take-up of Treasury bills and a further modest rise in the note circulation. "Hot" Treasury bills traded fairly quietly and with a firmer tendency, the quote being 6 25/26-5/16 per cent

#### Wall Street

New York, Aug 23.—Bargain hunters found some attractive prices in brisk trading on the New York Stock Exchange today. York Stock Exchange today.

The Dow Jones industrial average was ahead 3.56 points to 870.85 shortly before 11 am.

Advances led declines, 548 to 370, among the 1,400 issues crossing the tape. The 473 unchanged issues reflected some investor uncertainty.

View, hour, wolumn amounted to First-hour volume amounted to about five milion compared with 19 million in the same period on

New York, the New York Stock Exchange closed slightly higher in light trading despite a flurry of buying interest in some of the blue chips. US gold again lower
